

Program Your Replacement Pad/Mat to TL-2100W

Quick Start Instructions

- 1 ENTER PROGRAMMING MODE:** Press and hold the Program button on the back of the monitor until you hear three short beeps to enter programming mode. Release the button.

- 2 PROGRAM DESIRED COMPONENTS:**

***Have components ready before starting**

CordLess Sensor Pads/Mats: The transmitter must already be connected to a sensor pad/mat. Ensure that batteries are installed. Turn on the transmitter by pressing in the small button on back of the transmitter. Place pressure on the sensor pad/mat for 2-3 seconds and then release. Place pressure on the sensor pad/mat and then release.

- 3 *If programming multiple components, repeat step 2 until all components have been programmed & continue to step 3 to exit programming.**

EXIT PROGRAMMING MODE: Once the programming is complete, press and release the Reset button on the front of the monitor.

Transmitter Instructions WT-01

Please make sure your transmitter inside the neck of your sensor pad/mat is turned on before trying to program monitor

1. Open neck of pad and pull out transmitter.
2. Turn on the transmitter by pushing in the On/Off button on the back.
3. Once the transmitter is On, you should see the red light turn on and stay lit for a short time on the top side on the transmitter.
4. Once the red light turns off, it should blink periodically to show that it has power.
5. If desired, select the preferred delay for the transmitter to send a signal (0, 1, or 2 seconds). The default setting is no delay (0 seconds).
6. Place the transmitter back inside the neck of the pad and seal closed with provided sticker.
7. You may now proceed with programming your Sensor Pad/Mat with the monitor. See monitor instructions for programming.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
