Solder Board-Component View 6	 A photograph showing a small, dark, rectangular component (likely a microcontroller or similar integrated circuit) mounted on a blue solder mask. The component is positioned next to a black L-shaped ruler with white markings. The ruler has two scales: one horizontal scale from 0 to 100 mm and one vertical scale from 0 to 80 mm. The component is located near the intersection of the scales, approximately at the 20 mm mark on the horizontal scale and the 10 mm mark on the vertical scale.
Solder Board-Component View 7	 A photograph showing the same small, dark, rectangular component mounted on a blue solder mask. The component is positioned next to a black L-shaped ruler with white markings. The ruler has two scales: one horizontal scale from 0 to 100 mm and one vertical scale from 0 to 80 mm. The component is located near the intersection of the scales, approximately at the 20 mm mark on the horizontal scale and the 10 mm mark on the vertical scale.

Solder Board-Component t View 8	 A photograph of a small, square, gold-colored solder board component. The component is positioned on a blue textured surface. A black L-shaped ruler is placed next to it for scale. The vertical ruler shows markings from 0 to 100 mm, and the horizontal ruler shows markings from 0 to 100 mm. The component is located at approximately 10 mm on the vertical ruler and 10 mm on the horizontal ruler.
Solder Board-Component t View 9	 A photograph of a small, rectangular, gold-colored solder board component. The component is positioned on a blue textured surface. A black L-shaped ruler is placed next to it for scale. The vertical ruler shows markings from 0 to 100 mm, and the horizontal ruler shows markings from 0 to 100 mm. The component is located at approximately 10 mm on the vertical ruler and 10 mm on the horizontal ruler.
