

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

Model: HN-7278HD

EUT Housing and Board View 1	 A photograph showing the disassembled components of the EUT. On the left is the black plastic housing with the internal circuit board and components visible. To its right is the clear plastic protective cover. A black L-shaped ruler with white markings in millimeters and centimeters is placed below the components for scale. The background is a light blue surface.
Solder Board-Component View 1	 A close-up photograph of the internal circuit board component. The board is populated with various electronic components, including a large integrated circuit, capacitors, and resistors. A black L-shaped ruler with white markings is placed to the left of the board for scale. The background is a light blue surface.

Solder Board-Component View 4	 A photograph of a small, dark, rectangular electronic component with a star-shaped logo on the left and a small component on the right. It is placed on a blue textured surface next to a black L-shaped ruler with white markings in millimeters and centimeters.
Solder Board-Component View 5	 A photograph of the same electronic component from a different angle, showing two yellow components labeled 'LED' and 'R10'. It is placed on a blue textured surface next to a black L-shaped ruler with white markings in millimeters and centimeters.

Solder Board-Component View 6	 A photograph of a small, black, rectangular electronic component with gold-colored pins, resting on a blue textured surface. The component is positioned between two black rulers with white markings. The ruler on the left is oriented vertically, and the ruler on the bottom is oriented horizontally. The component is located approximately at the 10 mm mark on the horizontal ruler and the 20 mm mark on the vertical ruler. The component has several markings, including "M-7208HD-111UM", "0.4V-0", "3-20211214", and "0.4V-0".
Solder Board-Component View 7	 A photograph of a small, green, rectangular electronic component with a gold-colored pin, resting on a blue textured surface. The component is positioned between two black rulers with white markings. The ruler on the left is oriented vertically, and the ruler on the bottom is oriented horizontally. The component is located approximately at the 10 mm mark on the horizontal ruler and the 20 mm mark on the vertical ruler. The component has several markings, including "E04554", "20-0", "30-A", and "24V-0A".

Solder Board-Component View 8	 A photograph of a small, rectangular green printed circuit board (PCB) component. The component is positioned on a blue textured surface. A black L-shaped ruler is placed next to it for scale. The vertical ruler on the left shows markings from 0 to 100 mm, and the horizontal ruler at the bottom shows markings from 0 to 100 mm. The component is oriented horizontally, with its longer side parallel to the horizontal ruler.
Solder Board-Component View 9	 A photograph of the same small, rectangular green PCB component from a different perspective. The component is placed on the same blue textured surface. A black L-shaped ruler is used for scale, with the vertical ruler on the left and the horizontal ruler at the bottom, both showing markings from 0 to 100 mm. The component is oriented horizontally, with its longer side parallel to the horizontal ruler.
