Solder Board-Component View 4	 A photograph of a small, dark, rectangular electronic component, likely a solder mask or a small PCB, placed on a blue textured surface. The component is positioned horizontally. To its left is a black L-shaped ruler with white markings in millimeters. The ruler's vertical scale ranges from 0 to 100 mm, and the horizontal scale ranges from 0 to 100 mm. The component is approximately 10 mm long and 5 mm wide. It features a small, light-colored, star-shaped mark on the left side and a small, dark, rectangular mark on the right side.
Solder Board-Component View 5	 A photograph of the same small, dark, rectangular electronic component, placed on a blue textured surface. The component is positioned horizontally. To its left is a black L-shaped ruler with white markings in millimeters. The ruler's vertical scale ranges from 0 to 100 mm, and the horizontal scale ranges from 0 to 100 mm. The component is approximately 10 mm long and 5 mm wide. It features two small, light-colored, rectangular marks on the left side, each labeled 'LED2'.

Solder Board-Component View 6	 A photograph of a small electronic component, likely a microcontroller or sensor, mounted on a blue solder mask. The component is rectangular with several pins and a central chip. It is positioned next to a black L-shaped ruler with white markings in millimeters. The ruler shows dimensions from 0 to 100 mm on both the horizontal and vertical axes.
Solder Board-Component View 7	 A photograph of the same electronic component from a different angle, showing the underside or a different side. The component is mounted on a blue solder mask. It is positioned next to a black L-shaped ruler with white markings in millimeters, similar to the one in View 6.
