Ladies and gentlemen,

We hereby declare that the LS3+ Premium and the LS4+ Premium+ variants have a common PCB layout, differing only in the assembled components. To understand what is placed in each variant, it is necessary to take a look at the bill of material in addition to the schematics. LS3+ Premium variant only uses a single ATC6QPL004 radio module as indicated in the bill of material (see installation point D7300), which is also provided.

Yours sincerely

Jörg Maiwald
(Project Director CIVIC)
