

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of an Electronic Under Test (EUT). The components are laid out on a blue surface next to a black ruler with white markings. The components include a white circular lid, a white dome-shaped housing, a white circular base with a black circular opening, and a green printed circuit board (PCB) with various electronic components. Wires are connected to the PCB and the base.
Solder Board-Component View 1	 A photograph showing a close-up of a soldered board component. The component is a small, circular, silver-colored metal part with two mounting holes. It is soldered to a green PCB. A multi-colored wire (red, yellow, green, blue) is connected to the component. The component is placed on a blue surface next to a black ruler with white markings.

Solder Board-Component View 2	 A photograph showing a small, circular electronic component with a white top and a blue base, mounted on a blue PCB. The component has two small metal tabs on the top and a multi-colored ribbon cable connected to the bottom. It is placed on a black surface with a white ruler for scale. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The component is positioned near the 10 mm mark on the ruler.
Solder Board-Component View 3	 A photograph showing a small, rectangular electronic component with a green top and a white base, mounted on a blue PCB. The component has several small metal tabs on the top and a multi-colored ribbon cable connected to the bottom. It is placed on a black surface with a white ruler for scale. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The component is positioned near the 10 mm mark on the ruler.

Solder Board-Component View 4	 A photograph of a small, green, rectangular component labeled "MV-PWR-HL V5.0" mounted on a blue solder mask. The component is positioned between two black rulers with white markings. The vertical ruler on the left shows measurements from 0 to 100 mm, and the horizontal ruler at the bottom shows measurements from 0 to 100 mm. The component is approximately 10 mm wide and 5 mm high.
Solder Board-Component View 5	 A photograph of a larger, circular component with a complex internal circuit board mounted on a blue solder mask. The component is positioned between two black rulers with white markings. The vertical ruler on the left shows measurements from 0 to 100 mm, and the horizontal ruler at the bottom shows measurements from 0 to 100 mm. The component is approximately 40 mm in diameter.

Solder Board-Component View 6	 A photograph of a circular printed circuit board (PCB) component, likely a module, resting on a blue textured surface. The component is surrounded by a black ruler with white markings in millimeters. The ruler is oriented vertically on the left and horizontally at the bottom. The component itself is dark with various electronic components, including a central square chip, several smaller chips, and solder points. The ruler markings range from 0 to 100 mm on both axes.
Antenna View	WIFI Antenna  A photograph of the same circular PCB component, showing a different view. A red rectangular box highlights a specific area on the component, which is identified as the WIFI Antenna. A red line points from the text 'WIFI Antenna' to this box. The component is placed on a blue textured surface, and a black ruler with white markings is visible in the background, similar to the first image. The ruler markings range from 0 to 100 mm on both axes.
