

How to connect in APP

1. Registration

Open the app of PV Pro and register an account.

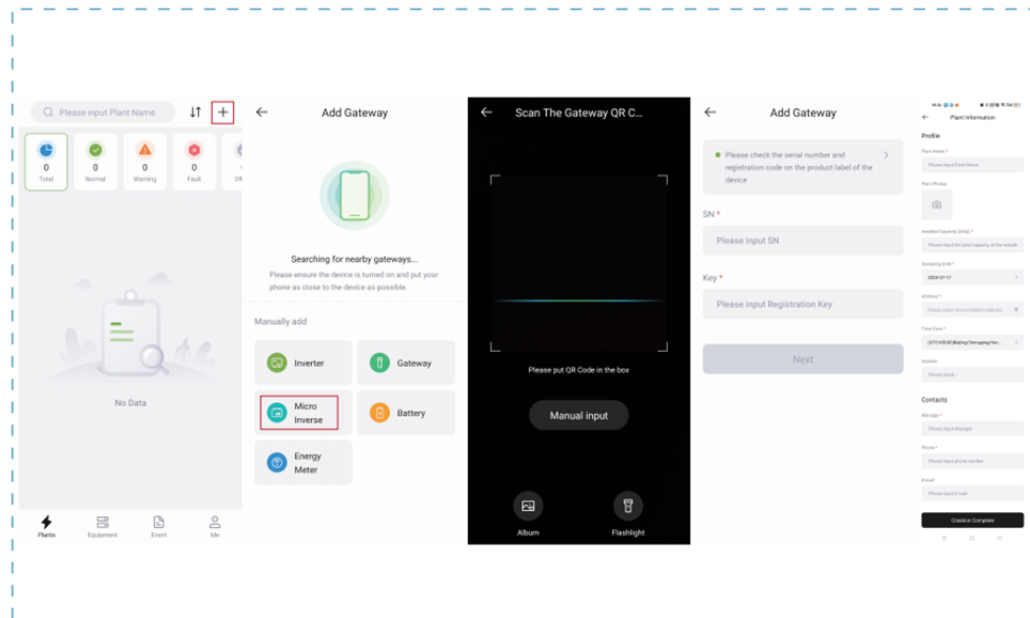

Click "Register" and create your account here.

The image displays two screens from the PV Pro app. The left screen is the login page, featuring a 'Log in' button and a 'Register' link (highlighted with a red box) for users without an account. It includes input fields for email and password, a 'Forgot Password' link, and a checkbox for the user agreement. The right screen is the 'Sign Up' page, which has tabs for 'E-mail' and 'Phone Number'. It contains input fields for email, verification code, password, and confirm password, along with a 'Get Code' button and a checkbox for the user agreement.

2. Create a Plant

Go to the power station list page, click "Create plant" button to enter the create plant page, you can choose scan QR code or manual input SN and Key. Please fill in plant basic info and other info here.

The image shows a sequence of four screens in the PV Pro app. The first screen is the 'Please input Plant Name' page, with a red box highlighting the '+' button to create a new plant. The second screen is the 'Add Gateway' page, showing a search for nearby gateways and a 'Manually add' section with options for Inverter, Gateway, Micro Inverse (highlighted with a red box), and Battery. The third screen is the 'Scan The Gateway QR Code' page, with a 'Manual input' button. The fourth screen is the 'Add Gateway' page, where users can input the SN and Key for a device, followed by a 'Next' button. The final screen shows the 'Plant Information' page, where users can fill in details like Plant Name, Plant Address, and contact information.
