2. Test Result

2.1. Test Setup

2.2. Measurement Procedure

- The RF exposure test was performed in anechoic chamber.
- The measurement probe was placed at test distance (4, 6, 8, 10, 15 cm) which is between the edge of the charger and the geometric center of probe.
- The highest emission level was recorded and compared with limit as soon as measurement of each points (A, B, C, D, E, F) were completed.
- The EUT was measured according to the dictates of KDB 680106 D01 v03.

Note;

- Because of measurement probe antenna size, minimum distance between charger and probe is 4 cm for E-Field and 6 cm for H-Field.

2.3. Equipment Approval Considerations item 5 b) of KDB 680106 D01 v03.

- (1) Power transfer frequency is less than 1 MHz.
- The device operates at a frequency 120 kHz.
- (2) Output power from each primary coil is less than or equal to 15 watts.
- Output power from primary coil: 10 watts.
- (3) The transfer system includes only single primary and secondary coils. This includes charging systems that may have multiple primary coils and clients that are able to detect and allow coupling only between individual pairs of coils.
- The transfer system including a charging system with multiple primary coils are to detect and allow only between individual pairs of coils.
- (4) Client device is placed directly in contact with the transmitter.
- Client device is placed directly in contact with the transmitter.
- (5) Mobile exposure conditions only (portable exposure conditions are not covered by this exclusion).
- Mobile exposure conditions only.
- (6) The aggregate H-field strengths at 15 cm surrounding the device and 20 cm above the top surface from all simultaneous transmitting coils are demonstrated to be less than 50 % of the MPE limit.
- Refer to following test results.
The EUT H-Field Strength levels at 15 cm < 50 % of the MPE H-Field Strength limit 1.63 A/m
0.216 A/m (Max. at 15 cm) < 0.815 A/m

Remark:

According to TCB workshop 2020, If the measured H-field values are below 100 % of the applicable limit in 47 CFR §1.1310, no additional testing is necessary.
