10.FREQUENTLY ASKED QUESTIONS

Q1: I cannot set up the cloud camera to my WiFi network?

A1: ①.Device works with 2.4GHz WiFi only, but not support 5GHz WiFi.②WiFi signal is not strong enough, try to keep the cloud camera near the WiFi router when setting up. ③. The WiFi password is wrong. Please check if there are special characters in the password, or the network is specially encrypted.

Q2: How do I know if I have 2.4G or 5G WiFi?

A2: Please check the user manual of your Router or call the network operator for help.

Q3: Can I only view my cloud camera when I am on the same WiFi network, or can I view it over internet from anywhere?

A3: You can view the cloud camera from anywhere, as long as your cloud camera is connected to the internet and you have internet connection on your smart device.

Q4: Do any of the recordings get saved to the cloud? Or is it mainly saved in the built-in SD card?

A4: It supports SD card recording as well as cloud storage. You can activate the cloud storage service in app.

Q5: What happens when the SD card is full?

A5:When the memory card is full, the cloud camera automatically erases the oldest footage.

Q6:Does it work with Google Home or Alexa?

A6: This model does not support Google Home or Alexa.

Q7: Why does it lose connection to WiFi?

A7: Please check the network connection of your smart device and the WiFi router. If the network signal is not strong enough, you may need to move your router closer to the device, or use an extender.

Q8:Can motion detection be disabled?

A8:Yes. Recording is triggered by detected motions. You can adjust the sensitivity or disable motion detection in the setting menu.

Q9: Can I use 2 or more cloud camera's in the same house?

A9: Yes. You can add more than one device at the same house.

Q10:How can I share this product?

A10: The person you shared must register an account. After that there are two way to share the cammera: Method 1: Scan the QR Cord ; Method 2 : Input the person you shared APP account.

Q11: What's the capacity of the Battery? Is it the solar panel include?

It is built-in 4x 18650 batteries with 12000mAh capacity and solar panel included for charging. Once installed, do not worry about battery out of.

Q12:What's the view angle of this camera?

A12:This camera wide angle view is 120 degree

Q13:How long is my cloud camera covered under warranty?

A13:We provide a 12-month warranty on all our products after purchase (with some exceptions).

Unfortunately we cannot treat products that have become defective due to incorrect use, fall damage, water damage, etc.

11.FCC Statement

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
