Responsible for your hearing
To avoid hearing loss, turn down the volume of the music player before wearing headset. After putting on the Headphone, slowly adjust the volume to a suitable level.

The unit of measurement for noise is (db). Long-term exposure to 85db or higher noise environment may cause hearing loss gradually. Monitor usage; hearing loss is the result of too much noise and time, The louder the sound, the more time to reduce exposure to noise. The softer the voice, the longer you can listen. Please visit the Consumer Electronics Association website (www.ce.org) to learn how to establish a safe listening level and review other important safety guidelines. For important information on how to prevent noise-induced hearing loss (NIHL) and a complete list of what noise can cause hearing loss, please refer to the website of the Foundation for the Study of the Hearing Impairment: www.drf.org.

Battery usage note
· There is an explosion risk if the battery is not replaced properly. Batteries can only be replaced with batteries of the same type or equivalent. It is not recommended to replace the battery without permission, but it can be returned to the manufacturer for replacement.
· The cell [battery pack or battery pack and] shall not be exposed to conditions such as sunlight, fire or similar overheating.
