

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of an EUT. A small blue printed circuit board (PCB) is connected to a yellow rectangular component. The components are placed on a blue textured surface. A black ruler with white markings is positioned vertically and horizontally to provide scale. The vertical ruler shows markings from 0 to 100 mm, and the horizontal ruler shows markings from 0 to 100 mm.
Solder Board-Component View 1	 A close-up photograph of the solder board component. The component is a small blue PCB with various electronic components. It is placed on a blue textured surface. A black ruler with white markings is positioned vertically and horizontally to provide scale. The vertical ruler shows markings from 0 to 70 mm, and the horizontal ruler shows markings from 0 to 100 mm.

Solder Board-Component View 2	 A photograph showing a small, blue, oval-shaped electronic component mounted on a black printed circuit board (PCB). The component has several small, gold-colored solder joints. A black ruler with white markings is placed next to the component for scale. The ruler shows measurements in millimeters (mm) and centimeters (cm). The component is positioned near the 10 mm mark on the ruler. The background is a light blue, textured surface.
Solder Board-Component View 3	 A photograph showing a small, yellow, rectangular electronic component mounted on a black printed circuit board (PCB). The component has two thin, black wires extending from it. A black ruler with white markings is placed next to the component for scale. The ruler shows measurements in millimeters (mm) and centimeters (cm). The component is positioned near the 10 mm mark on the ruler. The background is a light blue, textured surface.
