

Performance

Product Name	Air Purifier
Rated Voltage	110V~120V~
Rated Frequency	50Hz/60Hz
Product Usage	Removes odors, such as particulate matter, gas pollutants, and microorganisms in the air.
Method of Cleaning	1. Washable pre-filter 2. Replace dust and carbon filters (HEPA+Activated carbon)
Rated Power	43W
Particulate CADR	200m ³ /h
Particulate CCM	P1
Energy Efficiency Index	Qualified "Energy-label"
Noise	57dB(A)
Applicable area	14-26 m ²
Product size	325x172x510mm
Weight	3kg

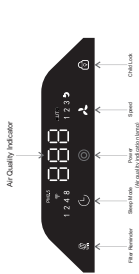

Product Structure

Features

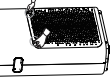

- Pre-filter**
The primary filter is the primary filter of the air purifier. It is mainly used to filter dust particles above 5 microns, including large particles of dust, dander, pollen, feeding material and other pollutants. Can be cleaned and reused multiple times.
- HEPA+ activated carbon composite filter**
The activated carbon filter is based on the standard of filter material for household purifier filtration. This loose polymer material is used as the carrier, and the high-strength activated carbon is loaded on the surface of the carrier. It has a large adsorption capacity, strong, the wind resistance is small, and the filter function is good. With high-quality powdered activated carbon as adsorbent material, it has good adsorption and dust collecting effect, good for removing high strength and low concentration of formaldehyde, benzene, toluene, xylene, trimethylamine, harmful gas with good adsorption function.
The HEPA filter filters 0.3 micron particles of bacteria, smoke and dust in the air, and the filtration efficiency is over 99%. Combined with multi-purpose filter, the HEPA filter filters out tiny particles larger than 20 nanometers in diameter, including bacterial molds, dust, allergens and some viruses, while also filtering out human flu virus and Legionella bacteria are all larger than 20 nanometers, so this product can be filtered out

Installation

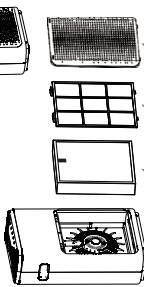

•Install filter

- First, remove the filter from the plastic bag.
- Remove the filter from the plastic bag.
- Remove the filter from the plastic bag.

Note: Push out the corner of the plastic bag from the filter before use.

Press the "FRESH" on both sides of the front cover and open the front cover.

Note: There are internal and external points, the one with the pull tab facing out, be sure to install the front panel before use.

Filter/ dust sensor maintenance

1. Pre-filter (about half a month)
Use a vacuum cleaner to remove dust from the air face of the filter, or wash it with water and dry it thoroughly.
2. HEPA+ activated carbon composite filter (about once every two months)
When the 1500-hour filter replacement prompt appears, press and hold the reset button to clear. After the filter indicator light and reset timing function.

- Place the filter in a ventilated place so that the harmful gases and bacteria on the filter can be removed.
- Do not expose the filter to direct sunlight. Do not deposit food or other debris on the filter.
- Do not wash the filter with water.

X Tips

- Do not use the power plug before cleaning and maintenance.
- Do not operate with the filter removed (no dust removal effect, and the dust that is not removed will be blown out by the fan).
- Do not use the power plug for a long time (it will also consume power in standby mode).
- Do not use the power plug for a long time (it will also consume power in standby mode).
- Do not use the power plug for a long time (it will also consume power in standby mode).

How to use

1. After plugging in the power, you will hear a sound "D", the machine enters standby mode, and the air quality indicator will show red color.
2. Boot
After the power is turned on, the air quality indicator light is completely red, and the machine enters the automatic mode.
3. Timer
The machine's working time can be set by the timer button while the machine is in standby mode. Press the timer button to set the working time. After the time is set, the corresponding indicator light will be lit after the selected time.
4. Speed
Press the wind speed button to change the speed of the motor. It is divided into 1st gear, 2nd gear, 3rd gear, 4th gear, 5th gear, 6th gear, 7th gear, 8th gear, 9th gear, 10th gear, 11th gear, 12th gear, 13th gear, 14th gear, 15th gear, 16th gear, 17th gear,
