

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of an Electronic Unit (EUT). On the left is a black printed circuit board (PCB) populated with various electronic components, including a red capacitor, several integrated circuits, and surface-mount components. The PCB is labeled "DT-G5 V1.0" and "4204486_7380-210013". To the right of the PCB is a black plastic housing with a white border. Both items are placed on a blue surface next to a black ruler with white markings in millimeters. The ruler is oriented vertically, with the 0 mark at the top.
EUT Housing and Board View 2	 A photograph showing the internal components of an Electronic Unit (EUT) from a different perspective. The black PCB is on the left, featuring a large, circular, multi-layered component in the center, possibly a coil or a large capacitor, with yellow and white wires connected to it. The black plastic housing with a white border is on the right. Both items are placed on a blue surface next to a black ruler with white markings in millimeters. The ruler is oriented vertically, with the 0 mark at the top.

Solder Board-Component View 1	 A photograph of a black printed circuit board (PCB) with various electronic components soldered onto it. The board is irregularly shaped with a central circular cutout. Components include a microcontroller, several resistors, capacitors, and a red component. The board is placed on a blue textured surface next to a black ruler with white markings in millimeters. The text "DT-G5 V1.0" and "4284486_1284-210413" are visible on the board.
Solder Board-Component View 2	 A photograph of the same black PCB from a different angle, showing the underside. It features a large triangular copper pad in the center, a red component, and several through-hole components. The board is placed on a blue textured surface next to a black ruler with white markings in millimeters.
