正面

I. Installation Steps

I. Installation Steps

1. Open the package and place MeituEve main device on the table (**do not touch the color card on the back of the chin support**).
2. Remove the hood from the package and attach it to the front of the main device. The device is in the correct position when the "meitu" logo on the hood is parallel to the table top.

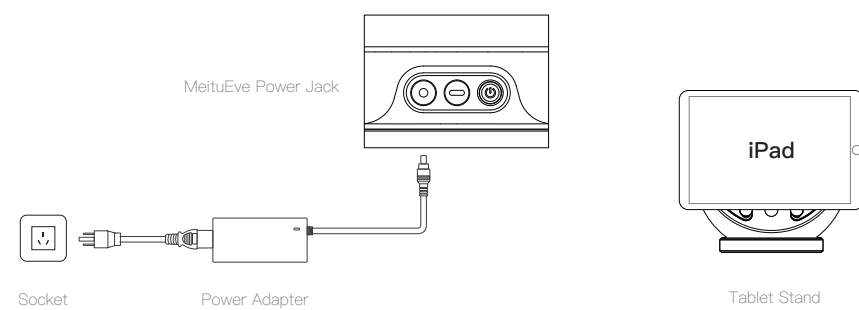

II. Power

1 , main device light

1, main device lights up, and there is a prompt tone, indicating that the MeliEve main device is powered

1. Open App Store on iPad to search for "MeituEve", then click to download and install the APP.
2. Open the MeituEve APP on the iPad and log in with the store account and password.
3. Connect the iPad tablet to MeituEve main device. Please place the iPad tablet on the tablet stand and connect it.
4. It according to the prompts of the MeituEve APP interface.

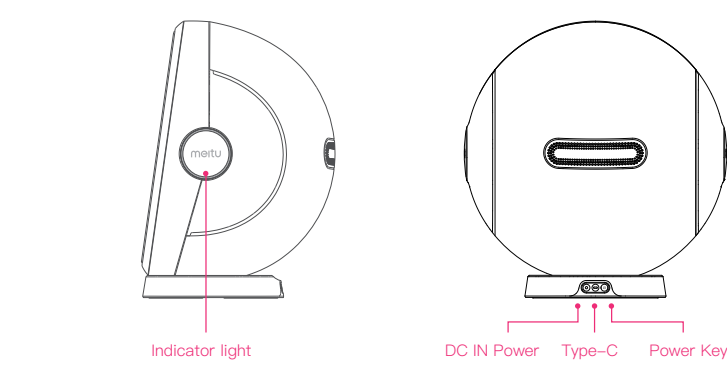

- 1 .Log in to the subject's

2. The subject sits down and places their head into the MeliVue main device with their chin on the chin support and head facing forward. Cover the subject's head with the hood to block external light sources and detect the skin using the main device by following the instructions on the iPad.
3. The subject can leave the main device after the "Analysis Complete" tone. The operator presents and explains the skin analysis report to the subject in front of the iPad screen.
4. Short press the Power Key at the back to turn off.

1. For sanitary reasons:

2. The casing for the MeltuEve main device is made from environmentally-friendly material; unfortunately, this means that it stains easily. If it stains, please wipe the stained spot with alcohol and a cotton cloth.

MeituEve main device status:

FCC Caution.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
