

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing a conducted emission test setup. On a wooden workbench, there is a spectrum analyzer or similar measurement device with a screen displaying a graph. A power supply unit is connected to the device. A power cord runs from the device to a power strip on the floor. A light bulb is placed on the workbench to illuminate the area.
Radiation Emission Test Setup (Below 30MHz)	 A photograph showing a radiation emission test setup. The room is lined with white, square-shaped electromagnetic interference (EMI) shields. A power supply unit is placed on a stand in the center of the room. A light bulb is placed on the stand to illuminate the area. The floor is marked with yellow and black diagonal stripes.

**Radiation Emission Test
Setup (30MHz to 1GHz)**

**Radiation Emission Test
Setup (1GHz to 18GHz)**

**Radiation Emission Test
Setup (Above 18GHz)**
