Model Differences Letter

IC: 25864-04610184

FCC: 2AVOV-04610184

mod. 04610184

The 1406 family of products for North America market is composed by following HVINs:

- ✓ 04610184
- ✓ 04610196
- ✓ 04610233

The only difference between them is:

04610184 Main model. See [04610184-drw.pdf](#)

04610196 The same as the Main model but without DRL function and without L13 LED. See [04610196.pdf](#)

04610233 The same as the Main model but without DRL function and without L13 LED. See [04610233.pdf](#)

All three HVINs have same hardware, same enclosure, same radio features. A daytime running lamp (DRL, also daytime running light) is an automotive lighting device on the front of a road-going motor vehicle. The differences between 04610196 and 04610233 are related to application software.

DRL function and application software are not relevant for testing so only model 04610184 has been tested.
