

FM Radio Mode

Indicator
Light

1. Press and hold the **FM** button to switch to FM Radio Mode. The indicator light will turn blue once in FM Radio Mode.
2. Press the **HI** button to automatically scan for available radio stations. Press the **HI** button again to remain on a specific channel during the scan. All radio stations scanned will be automatically saved. Press and hold the **+/-** buttons to cycle through saved stations.

Note:
Please use the provided USB-C® charging cable as an external antenna to improve signal strength when in FM Radio Mode.

Lights / Resetting Your Device

This device features 8 different LED light effects. Press the **FM** button to cycle through all 8 LED light effects.

If the speaker is not operating properly, you may reset it by pressing the **ON** button for 8 seconds. The speaker will power off and power back on again.

"Baby Shark" song arranged by Pinkfong and KizCastle, and performed by KizCastle, Sarah Bock, Andy Degan, Finn Phoenix, and Bommie Catherine Han.

Important Safety Warning

Protect Your Child from Potential Hazards!

Attention Parents and Guardians:

Your child's safety is of paramount importance to us. We must alert you to potential risks associated with the use of recalled bath toys, specifically when used in bathtubs or wading pools. It is crucial to understand and mitigate the potential dangers your child may face when interacting with these toys.

Potential Hazards:

Slip and Fall Risks: Please be vigilant when your child is using bath toys, including the Baby Shark Pool Speaker, in wet environments. Slips and falls can occur, leading to potential injuries. **Impalement, Lacerations, and Punctures:** The hard plastic top fin of the shark poses risks of impalement, lacerations, and punctures if a child falls or sits onto it. Immediate action must be taken to prevent such accidents. **Safeguarding Measures:**

Adult Supervision: Always supervise your child while they are playing with the Baby Shark Pool Speaker or any other bath toys. Maintain constant visual contact to ensure their safety. **Secure and Stable Environment:** Place the Baby Shark Pool Speaker on a stable surface, away from the edge of bathtubs or wading pools, reducing the risk of slips or falls. Confirm that the area is free from any potential hazards that could harm your child. **Educate and Warn:** Inform your child about the importance of safe play and the potential risks associated with the hard plastic top fin of the shark. Encourage them to avoid sitting or standing on it to prevent accidents. **Regular Inspection:** Before each use, carefully examine the Baby Shark Pool Speaker for any signs of wear, damage, or loose parts. If you notice any issues, discontinue use immediately and contact our customer support for assistance.

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
