

CBT-10Q 产品说明书

User Manual Wireless Charger	Product Introduction This is a multifunctional desktop magnetic 3 in 1 auto rotation wireless charger, which can wirelessly charge mobile phones, headphones, and watches at the same time by power supply. Bid farewell to wired shackles and start a wireless experience.	Product Parts Description 1 Touch button for rotation 2 Charging area for phone 3 Charging area for earphone 4 Charging area for watch 5 Indicator Light 6 Type-C input port	Specifications Input: DC 9V/3A, 5V/3A Output: 15W/5W Product Standard: Qi2 Charging Distance: ≤10mm Charging Efficiency: ≤80% Product Dimension: 76*76*109mm Product Material: Aluminum Alloy +Tempered Glass Input interface: Type-C port Fast wireless charging requires QC or PD adapters.	Indicators and Protection 1. Standby mode: The green LED light keeps on for 10 seconds and turns off. 2. Charging mode: Ice blue LED light breathing, once the phone is removed, the light turns off after 20 seconds. 3. FOD function: When metal or magnetic objects are placed on the charger, the ice blue LED light will flash 6 times and stop charging. 4. Perfect protective function based on over-voltage, over-current, over-temperature, and short-circuit protection. Attention 1. Please do not vigorously extrude or collide. 2. Please do not dismantle or put it into fire or water when the product is powered on, to avoid short circuit or leakage. 3. Please do not use it in a severely high temperature, high humidity, or corrosive environment, to avoid damage to the circuit leakage. 4. Please do not put the magnetic strip or chip card (Such as ID card, bank card, etc.) on the charging pad to avoid causing magnetic card loss of efficacy. 5. Please do not put the metal (Such as coin, etc.) on the charging pad when charging, to avoid damage from heating.
	Product Usage Guide 1. Please connect the product through the Type-C quick charging cable to the QC or PD power adapter, to ensure that it supports fast wireless charging. 2. Built-in stepper motor and touch button to support wireless charger automatic rotation function, compatible with different sizes of Qi-enabled smartphones. 3. Press and pop up the iWatch charging stand, place the Apple Watch to start wireless charging with 2.5W output. 4. Press and pop up the earphone charging stand, place the earphone case to start wireless charging with 2.5W output. 5. Touch-sensitive design that allows for the automatic rotation of your smartphone with different viewing angles. (Please do not rotate it by hand to avoid damage to the product. Please reconnect the power supply and touch button to adjust it to the correct position.)			

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radiofrequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The FCC certification of this device refers to RF exposure testing performed in typical operating conditions, where a person is no closer than 20 centimeters from the device surface at all times, except for non-repetitive patterns with transient time intervals in the order of a second. Only in the stated conditions, the device is shown to fully comply with the FCC RF Exposure requirements of KDB 447498.
