

Auto power on: When you open the charging case to take out the earphone, the earphone will automatically turn on.

Auto Power Off: When you put the earphone into the charging case, the earphone will automatically shut down.

Note: Earphones cannot be shut down manually.

① Earbuds will be turned on automatically when taking out from the charging case.

You can use the touch button as below when playing music.

► Press 1 time to pause the music, and press again to resume music playback.

► Double Click the left earphone (the Auxiliary L) to play the previous track.

Open the charging case and pick up the Host earphone(R). The R earphone will turn on automatically. Red and blue lights alternately flicker, then open your phone and turn on Bluetooth to make with it.
