SPECIFICATIONS

Adapter Input	AC100-240V,50/60Hz
Power	25W (DC 5V, 5A)
Color	RGB
Dimensions	H7ft × D31in
LED Number	460(18*25+10)
Waterproof	Light string(IP65) Control box(IP65) Adapter(IP44)
Connection	Wi-Fi+Bluetooth
Operating Temperature	-20°C~55°C/-4°F~131°F

PACKAGE LIST

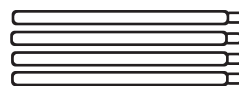

Tree base with
bottom rod *1

18-string light
bundle & Control box *1

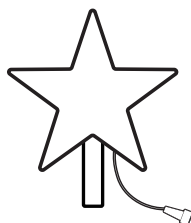

Adapter *1

White rod *4

White holder rod *1

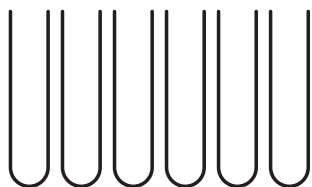

Star topper *1

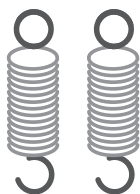

Screw *3

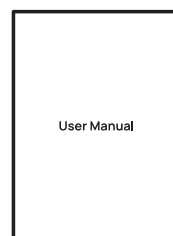

Circular disk *1

U-shaped stake *6

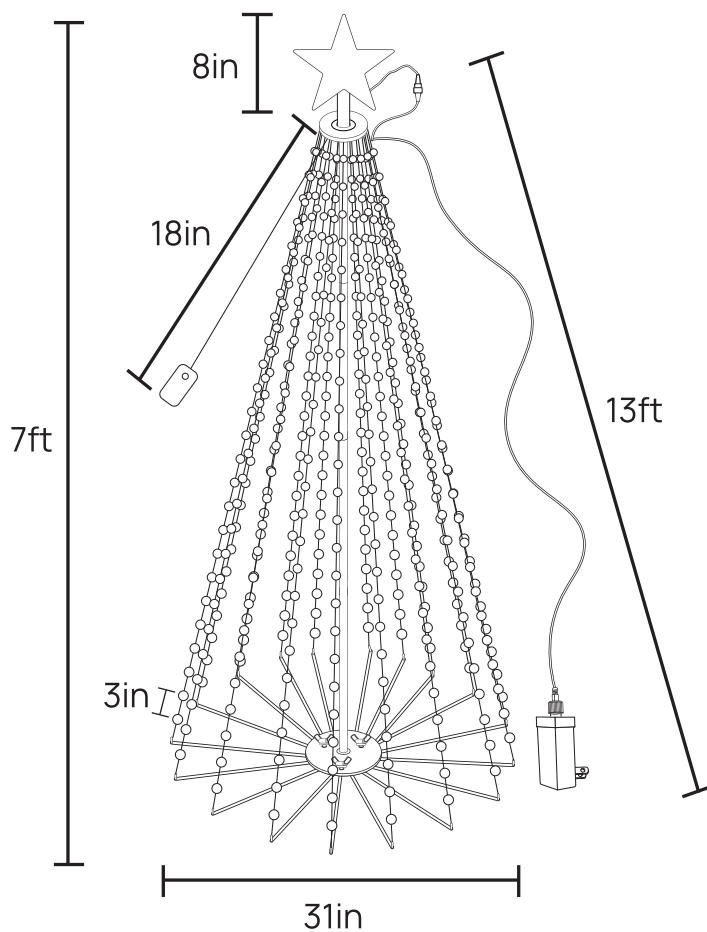

Spare spring *2

User Manual *1

DIMENSIONS

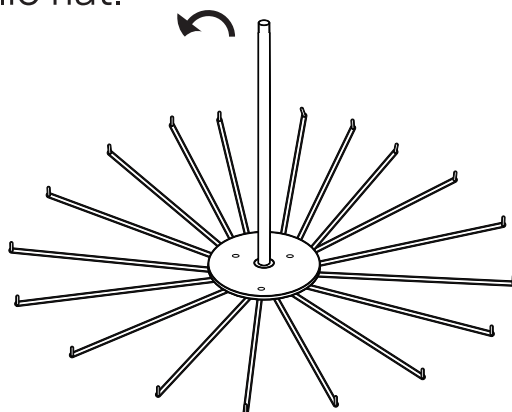

INSTALLATION GUIDE

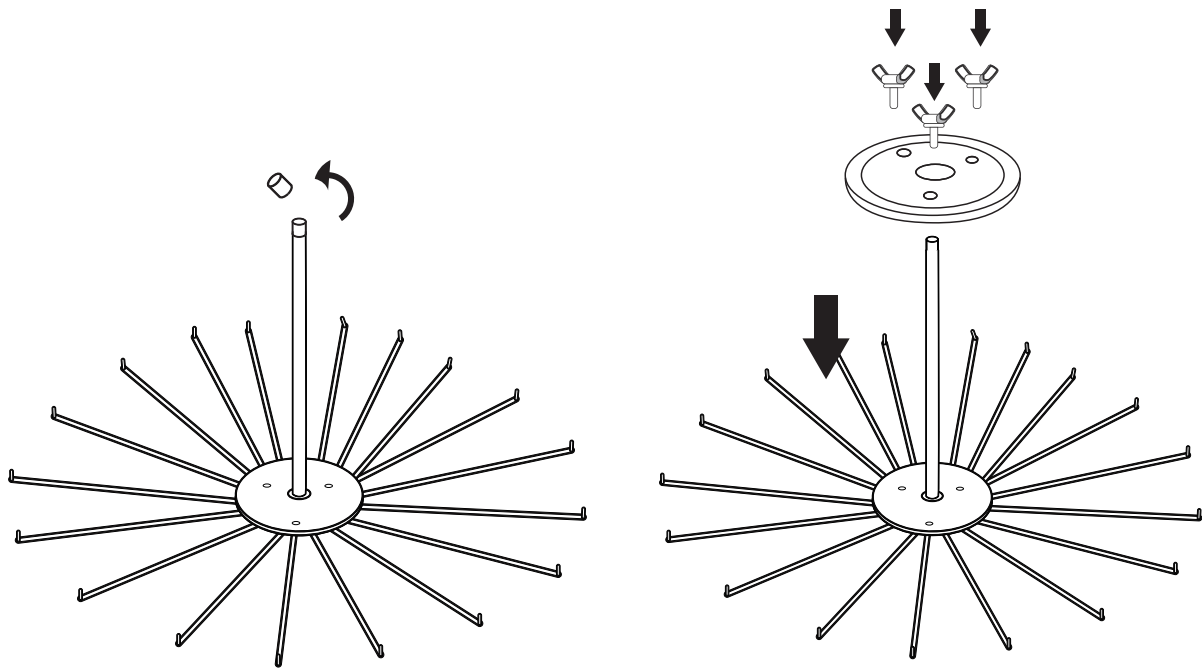

! Before installing the lights, connect the adapter, tighten the waterproof cap, and power on to confirm everything works.

*Be sure to disconnect power before beginning assembly.

1. Place the tree base on a flat surface. Pull the metal support legs downward so they lie flat.

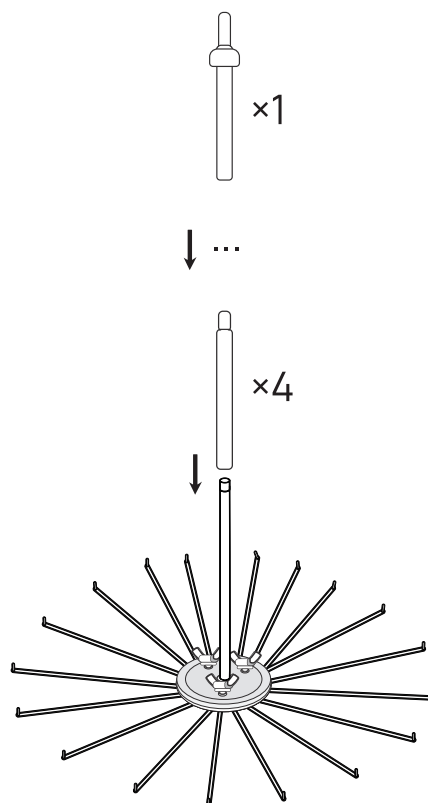

2. Remove the protective cap on the bottom rod, then slide the circular disk down the bottom rod and secure it with the screws.

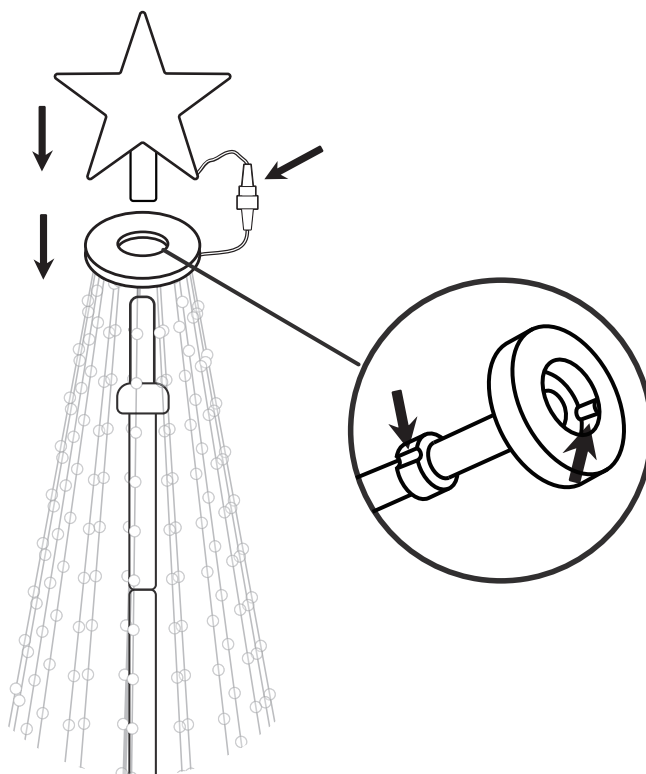

*Tip: When tightening the screws, the bottom disk may bulge upward—this is normal and will disappear once the entire tree is fully assembled.

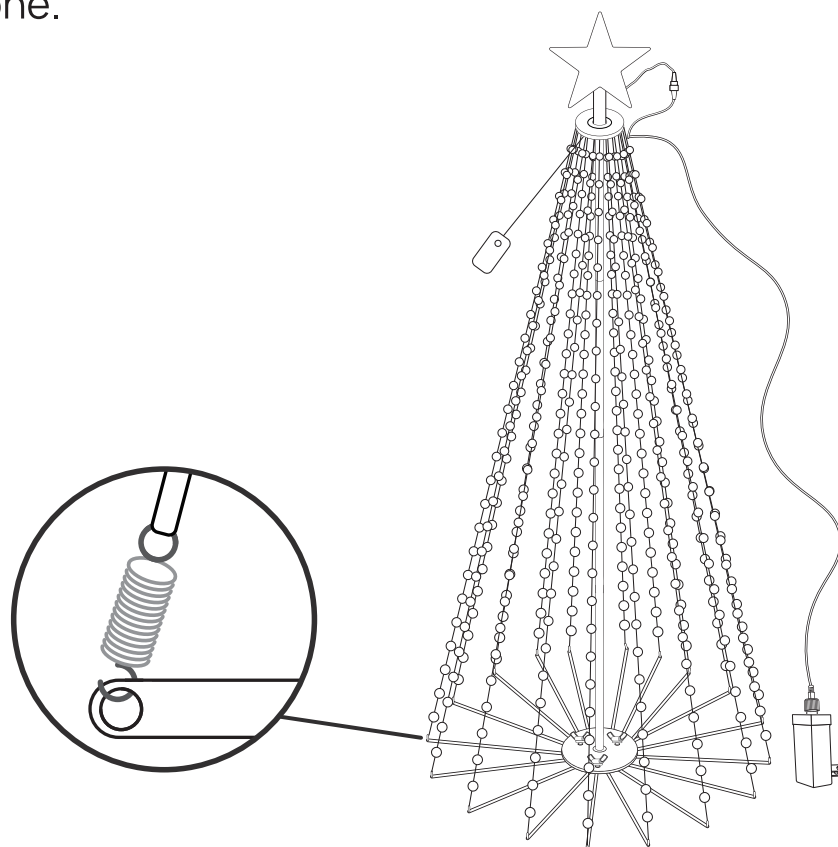

3. Insert the white connecting rods into the tree base one by one.

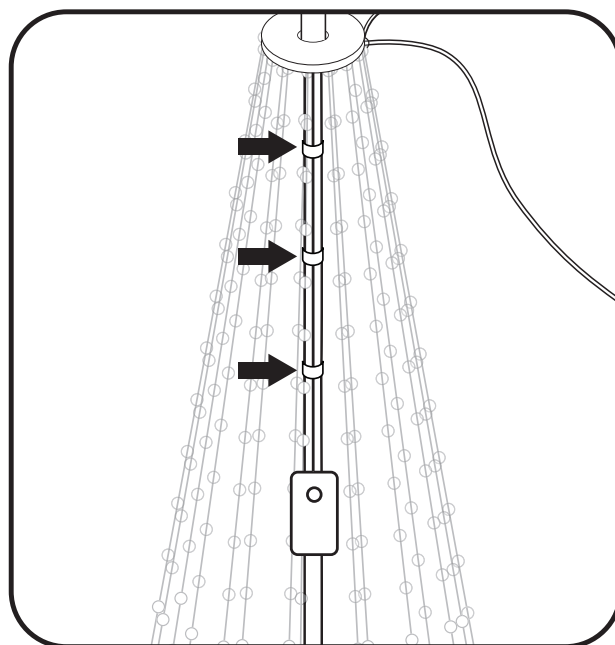

4. Position the lights and the star topper on the top of holder rod. Connect the star topper connector to the light-string connector.

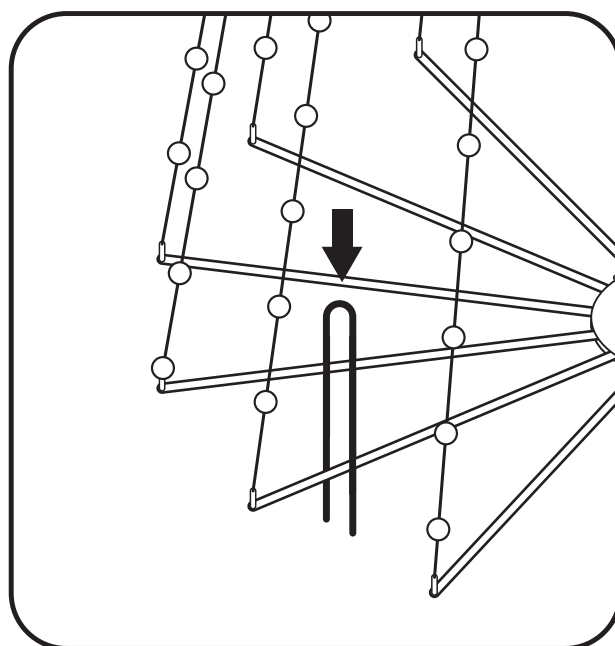

5. Carefully unroll each light string downward, then hook the spring at its tail to the corresponding support leg on the base one by one.

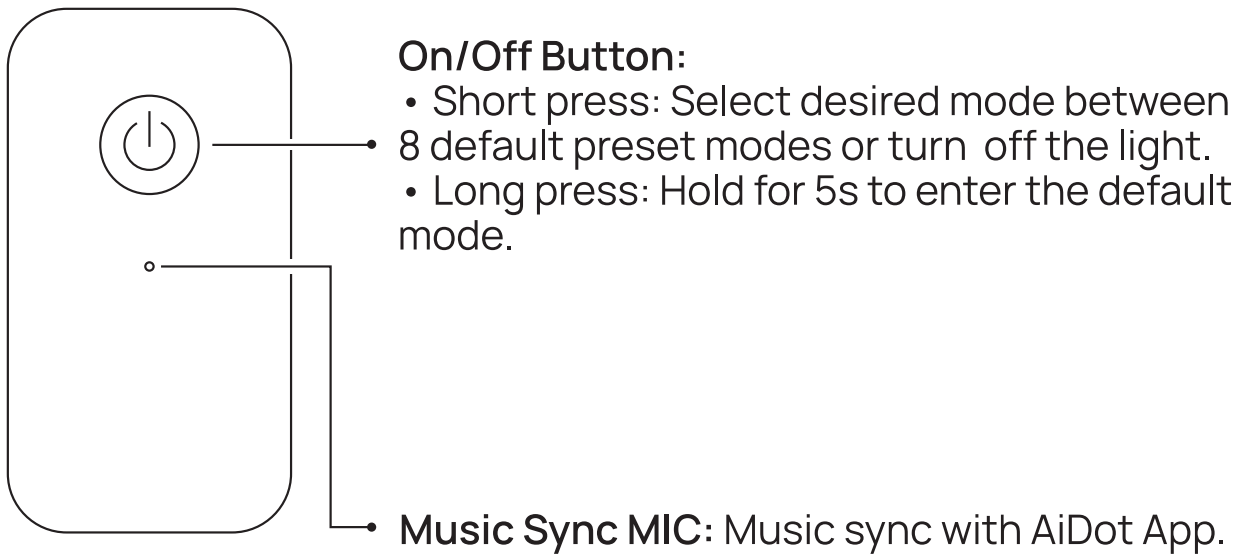

6. Reuse the hook-and-loop straps that bundle the light strings to secure the control box cable to the holder rod for wind-free placement.

7. For extra stability, secure the tree firmly to the lawn with U-shaped stakes.

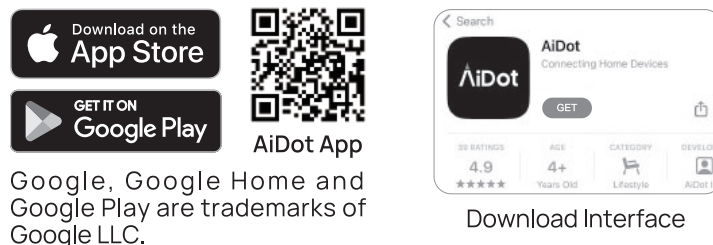

CONTROL BOX

*Explore extra features via the app.

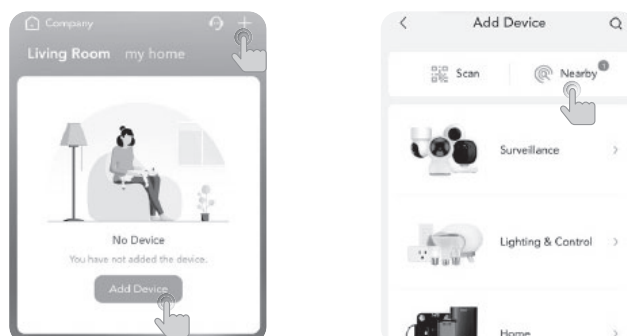

CONNECT TO THE AIDOT APP

1. Search "AiDot" on the App Store, Google Play, or simply scan the QR code.

2. Ensure your phone has Bluetooth and location services enabled. Give the AiDot App permission to these if requested.

3. Sign in or create a new account. Once signed in, tap '+' to begin adding your HT5.

4. The AiDot App will guide you through the rest of the process.

TROUBLE SHOOTING

1. The lights do not work/are malfunctioning:

- a) Check if the adapter used is the one provided.
- b) Power the lights off then on. Make sure the adapter and the control box have been powered on.
- c) Long press and hold the power button on the control box to enter the default mode.

2. Cannot connect to Aidot App:

- a) Do not skip the Bluetooth and Wi-Fi setup in the app.
- b) Make sure both Bluetooth and Wi-Fi are turned on in your smartphone.
- c) Power off the lights and the Bluetooth/Wi-Fi, then turn them back on and try again.

3. Device shows offline

- a) Please try control the device to see if it responds normally
- b) If the device does not respond, please try to power on the device again, and wait for 2 minutes to check whether the device is back online.

WARNINGS

This tree light does not include ground anchors. Strong impacts, rough play, or high winds may cause it to topple. Always secure the base before use and move the tree indoors or to a sheltered area during windy conditions.

Securing methods:

- Place sandbags, stones, or water-filled weights (≥ 10 kg) on the base disk.
- On grass, loop U-shaped stakes over the support legs and press them into the ground.

Adult supervision is required at all times; prohibit climbing or rough play around the tree.

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and (2) this device must accept any

interference received, including interference that may cause undesired operation.
Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE : This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum 20cm distance between the radiator and your body: Use only the supplied antenna.
