Light sources	400 LEDs
Operating temperature	-20°C~55°C
Waterproof rating	Lights Strings: IP65 Control box: IP65 Adapter: IP44
Control method	APP/Control Box/Voice Control

Package List

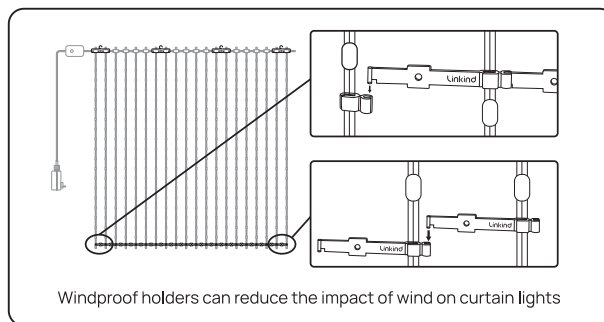

Dimensions

Using the Windproof Holder

1. Fix the string of lights at the buckle of the windproof holder and connect the windproof holder together.
2. Repeat the operation in 1 until the last string of lights, then fix the string of lights with small windproof holder.

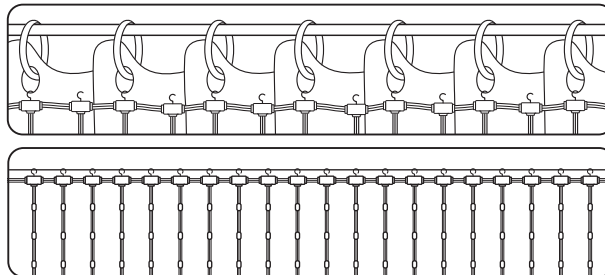

Installation Guide

⚠ Before installing the curtain light, please connect each segment of the lights and then power on to confirm if all devices are functioning properly.
 Note: Connect first, then power on.
 Do not connect after powering on to avoid a sudden surge of current that may damage the devices.

Method 1: Use a G4 hook

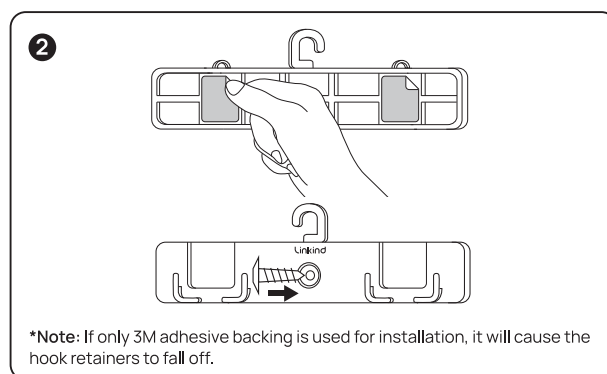

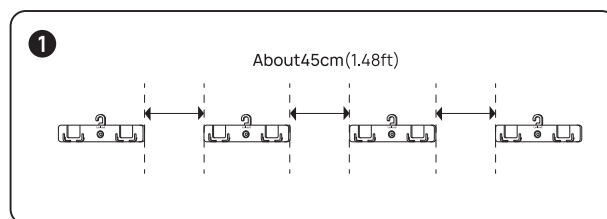

After choosing the installation location, hang the hook on the curtain cord or hang it on a rope

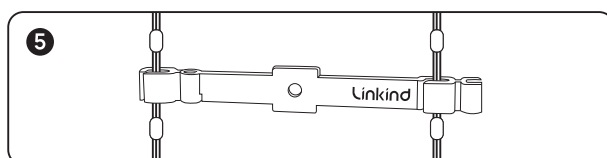

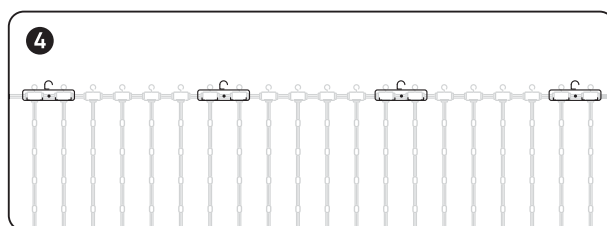

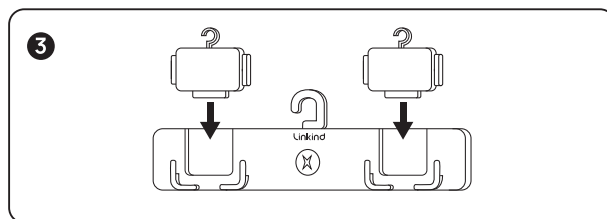

After installation using the above method, insert the lamp beads into the wind bracket, secure the lamp beads in place, and then connect the bracket together

Method 2: Quick installation

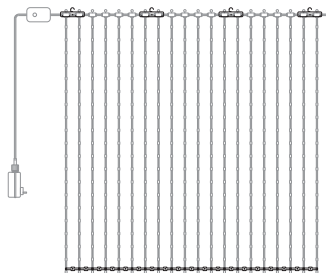

1. Fix hook retainers to the wall using screws (The distance between the center points of the two hook retainers is about 45cm) (1.48ft)
2. Quick installation Insert the hooks directly into the retainers, two for each retainer (4 Fixers are distributed on both sides and in the middle)
3. If you need to adjust the placement of the curtain light, remove it from the hook retainers

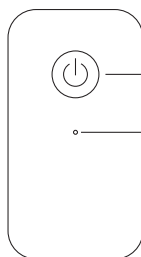

After installation using the above method, insert the lamp beads into the wind bracket, secure the lamp beads in place, and then connect the bracket together

6

Windproof holders can reduce the impact of wind on curtain lights

Using the Controller

On/Off Button:

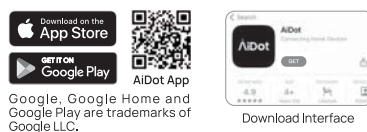

- Short press: Select desired mode between 8 default preset modes or turn off the light.
- Long press: Hold for 5s to enter the default mode.

Microphone

*Explore extra features via the app.

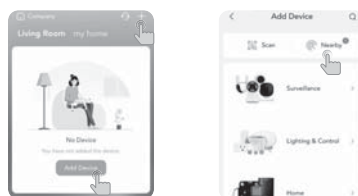

Connecting to AiDot App

1. Search "AiDot" on the App Store, Google Play, or simply scan the QR code.

2. Ensure your phone has Bluetooth and location services enabled. Give the AiDot App permission to these if requested.

3. Sign in or create a new account. Once signed in, tap '+' to begin adding your HC5C.

4. The AiDot App will guide you through the rest of the process.

Trouble Shooting

If you meet any question in use, feel free to contact us and we will do our best to help you solve it.

1、 The lights do not work/are malfunctioning:

- Check if the adapter used is the one provided.
- Power the lights off then on. Make sure the adapter and the control box have been powered on.
- Long press and hold the power button on the control box to restore factory settings.

2、 Cannot connect to Aidot App:

- Do not skip Bluetooth connection in the app.
- Ensure Bluetooth on your smartphone has been turned on.
- Power the lights and your smartphone Bluetooth off then on, then try again.
- Clear the obstructions that are between the lights and your smartphone.

3. Device shows offline

Please try control the device to see if it responds normally
If the device does not respond, please try to power on the device again, and wait for 2 minutes to check whether the device is back online

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum 20cm distance between the radiator and your body: Use only the supplied antenna.
