

LUDWIGSYSTEM

June 10th 2020

TUV SUD America Inc.
10 Centennial Drive
Peabody, MA 01960, USA

To whom it may concern,

We LudwigSystem GmbH (located at Reichenhaller Strasse 109, D-83435 Bad Reichenhall, Germany) hereby declare that, in order to comply with the FCC subpart 15.203, our remote control filed for FCC &ISED listing (FCC ID: 2AWA9-LHREG, IC 26059-LHREG) is to be considered as professionally installed.

The only permitted type of antenna provided by Ludwig System and to be used with the transmitter is the FLEXI 1/4 Wave Antenna BNC as per attached data sheet.

The remote control is sold as part of a system including radio-controlled lifting hooks. Those hooks are sold to and used exclusively by professionals in the manufacturing and construction industries to safely release the rigging from distance. Transmitters are not sold separately from the lifting systems provided by Ludwig System.

The system including the transmitter are not readily available to consumers for personal use but only sold to incorporated professionals of above-mentioned industries through a unique and exclusive authorized dealer in both the US and Canada. The exclusive authorized dealer is LudwigHook North America, located at 7240 Waverly Street H2R 2Y8 Montréal (QC) – Canada.

Installation of the transmitter within the lifting system is performed by skilled and qualified professionals from Ludwig System or Ludwig System North America prior shipping to customers in US and Canada.

As per the User Manual, customers to whom the device is sold are companies of the manufacturing and construction industries whose personnel are trained and qualified to operate in the field of crane & rigging operations.

Yours sincerely,

Name: Peter Ruf

Title: CEO LudwigSystem

Name: Sebastian Günnel

Title: Engineer LudwigSystem
