PRODUCT OVERVIEW

MONITOR

1. Indoor Temperature

2. Sensor Battery Level Indicator

3. Signal Strength Icon

4. Sensor Max/Min records in last 24 hrs

5. Max/Min records in last 24 hrs

6. Monitor Battery Level Indicator

7. Indoor Humidity

8. Temperature Measured by the Sensor

9. Max/Min Records / Pair Hub Button

◆ Short Press - Max/Min Records

◆ Long Press - Pair Hub

10. °C/°F Switch

Note:

◆ Reading on pool sensor will automatically refresh every 5 seconds.

◆ The pool temperature displayed on monitor will refresh every 3 mins.

◆ Indoor temperature and relative humidity displayed on monitor will refresh every 10 seconds.

01-

POOL SENSOR

1. Signal Transmitting Antenna

2. LCD Display

3. Short Press - °C/°F Switch

Long Press - Pair Monitor

02-

SPECIFICATION

MONITOR

◆ Indoor temperature range: 14°F~122°F (-9.9°C~50°C)

◆ Indoor humidity range: 1%~99%

POOL SENSOR

◆ Temperature range: 14°F~122°F (-9.9°C~50°C)

CONNECTION & INSTALLATION

INSTALLATION

◆ Please insert batteries in monitor first, and then put batteries into pool sensor. Pool temperature will display on monitor once connected successfully.

If failed, please reinstall monitor batteries and hold the "Pair Monitor" button on pool sensor.

◆ Please use fresh batteries. Do Not Mix Alkaline, Standard (Carbon-Zinc), or Rechargeable (Nickel Cadmium) Batteries.

03-

Note: The icon will flash when the monitor is under connecting mode. The sensor could be connected during this session.

TEMPERATURE SCALE SETTING

◆ The default temperature scale on pool sensor and monitor is Celsius. Please use °C/°F Switch button on device to adjust.

Tips: You could purchase an extra WiFi Hub and pair it with this Pool Sensor. Then you will be able to monitor the data via mobile app anytime anywhere.

TROUBLESHOOTING

PROBLEM	SOLUTION
Pool sensor is working, but the monitor shows dashes(--) on pool temperature section.	◆ Monitor might get disconnected with pool sensor. If fail to reconnect automatically, please keep monitor and pool sensor close to each other, and reinstall batteries in monitor and press "Pair Hub" button on pool sensor. ◆ It's advised not to have obstacles between the monitor and pool sensor, otherwise it may affect the stability of signal transmission. ◆ Make sure the Monitor is placed at least 3ft/0.9m away from electronics that may interfere with the wireless communication (e.g. computers, TVs, microwaves, other wireless transmitters or Monitors, etc.).
Inaccurate pool temperature reading on the Monitor.	◆ Usually caused by low batteries. Please try replacing them with new batteries.
Monitor or pool sensor shows H.H.H or L.L.L.	◆ Indicates that the measured water temperature exceeds the minimum and maximum temperature range, our temperature range is 14°F~122°F (-9.9°C~50°C). If the reading seems to be abnormal, please try to replace the batteries or contact us for assistance.
The thermometer does not show a reading for more than 15 mins or suddenly stops showing.	◆ Replace the batteries. ◆ Check that the thermometer is screwed in tightly. If water has seeped in, contact us for a replacement.

FCC STATEMENT

FCC ID: 2AWDBHCS0565ARF, 2AWDBHCS015ARF

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference.

2. This device must accept any interference received, including interference that may cause undesired operation.

FCC Warning: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

◆ Reorient or relocate the receiving antenna.

◆ Increase the separation between the equipment and the receiver.

◆ Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

◆ Consult the dealer or an experienced radio/TV technician for help.

Note: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.
