Function Introduction

Bluetooth Connection and Use

Connect the Bluetooth

1. Hold down the camera button on the remote for over five seconds, the Bluetooth is opened and the blue indicator flickers. Open the Bluetooth setting on your mobile phone. Search for the Bluetooth name "SelfieCom" and connect with it. When the indicator turns off, it indicates a successful connection with the Bluetooth.

2. Select the original camera/video on your mobile phone: single-click the camera button on the remote to take a picture / video with your original mobile phone.

* The remote needs to be connected with the Bluetooth Within five minutes after switching on the tripod. Or it will automatically turn off to save power. After ten minutes' connection with the Bluetooth, the remote will automatically enter standby status. Single-click the camera button to activate the remote controller.

* The max. remote distance of camera function is 20 meters. The max. remote distance of ascend/descend function is 10 meters.

* In case of replacing the battery, please order CR2032 button battery in the store.
