SAFETY AND HANDLING

Handle Ryth Pure and case with care. They contain sensitive electronic components, including batteries, and can be damaged, impair functionality, or cause injury if dropped, burned, punctured, crushed, disassembled, or if exposed to excessive heat or liquid. Don't use damaged Ryth Pure or case. Wipe off sweat from the earbuds and the charging case before charging. Remove headphones immediately if you experience a warming sensation. Don't attempt to alter this product or replace the batteries yourself.

The headset can produce high-volume and high-pitched sound. Exposure to such sounds may cause permanent hearing loss. The volume level may vary depending on the conditions of the mobile phone you are using, its reception status and volume settings, and the environment. Do not use the earbuds at high volume for an extended period. To avoid hearing loss, use headphones at a comfortable and moderate volume. Turn down the volume of your device first before putting on the earbuds, and then gradually increase the volume to a comfortable level.

If you use the headset to make a call while driving, you should use it with caution and follow the applicable laws regarding the use of mobile phones and headsets. Some local regulations have specific restrictions on the use of such products while driving, such as the configuration of a single earpiece. Do not use the headset for other purposes while driving.

If you use headphones when doing activities that require concentration, you should pay attention to the safety of yourself and others, such as when riding a bicycle or walking on or near roads, construction sites, or railways. You should remove the headphones or adjust the volume to ensure that you can hear the surrounding sounds, including alarm and warning signals.

Ryth Pure and case contain components and radios that emit electromagnetic fields. Ryth Pure and case also contain magnets. These electromagnetic fields and magnets may interfere with pacemakers, defibrillators, or other medical devices. Maintain a safe distance of separation between your medical

device and Ryth Pure and case. Consult your physician and medical device manufacturer for information specific to your medical device. Stop using Ryth Pure and case if you suspect they are interfering with your pacemaker, defibrillator, or any other medical device.

Avoid prolonged skin contact with a device, its power adapter, the charging cable and connector, or a wireless charger when plugged into a power source, because it may cause discomfort or injury. For example, while the case is charging using the charging cable and a power adapter or a wireless charger plugged into a power source, don't sit or sleep on the case, charging cable, connector, power adapter, or wireless charger, or place them under a blanket, pillow, or your body. Take special care if you have a physical condition that affects your ability to detect heat against your body.

Ryth Pure, the case, and small parts included with Ryth Pure may present a choking hazard or cause other injury to small children and pets. Keep them away from small children and pets. The earbuds and the case contain lithium-ion batteries, and may be hazardous if swallowed. If ingested, seek immediate medical attention.

REGULATORY COMPLIANCE

FCC Compliance Statement

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off

and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

ISED Canada Compliance

This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions:

(1) This device may not cause interference.

(2) This device must accept any interference, including interference that may cause undesired operation of the device.

L'émetteur/récepteur exempt de licence contenu dans le présent appareil est conforme aux CNR d'Innovation, Sciences et Développement économique Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes :

(1) L' appareil ne doit pas produire de brouillage;

(2) L' appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d' en compromettre le fonctionnement.
