1. Introduction

1.1. Objective

This document describes the antenna used in BRC3800 device, detailed antenna placement and main antenna radiation properties are presented.

2. Antenna in BRC3800

BRC3800 includes integrated antenna inside to device mechanics, more specifically in to the BRC3800 main PCB (Printed Circuit Board). Antenna is copper trace on the PCB, linearly polarized. Antenna designed to operate Bluetooth operating band 2402-2483.5MHz and utilized by BLE (Bluetooth Low Energy) system at BRC3800 device.

2.1. BLE-antenna

Antenna radiator presented in Figure 2.0. Physical dimension of antenna is (W x L) 20.00mm X 6.00mm.

2.2. BLE-antenna photographs

3. BRC3800 antenna peak and average gain data

The antenna orientation and positioning are shown in Figure 3.0. Antenna measurements system in Figure 3.1. Antenna peak and average gain are presented as function of frequency (figure 3.2 and figure 3.3). Antenna maximum gain is 5.0dBi. 1D radiation patterns plane cuts from frequencies 2400MHz, 2440MHz and 2480MHz are presented in figure 3.4, figure 3.5 and figure 3.6.
