O dispositivo foi avaliado para atender aos requisitos gerais de exposição à RF. O dispositivo pode ser usado em condições de exposição portátil sem restrições.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

The device meets the EU ROHS criterion. Please refer to IEC 62321, EU ROHS Directive 2011/65/EU and revised directive.

This device complies with Part 15 of the FCC Rules.Operation is subject to the following two conditions:

- this device may not cause harmful interference, and
- this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could avoid the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

CAUTION

- Risk of explosion if the battery is replaced by an incorrect type;
- disposal of a battery into fire or a hot oven, or mechanically crushing or cutting of a battery, that can result in an explosion;
- leaving a battery in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas;
- a battery subjected to extremely low air pressure that may result in an explosion or the leakage of flammable liquid or gas.

Old electrical appliances must not be disposed of together with the residual waste, but have to be disposed of separately. The disposal at the communal collecting point via private persons is for free. The owner of old appliances is responsible to bring the appliances to these collecting points or to similar collection points. With this little personal effort, you contribute to recycle valuable raw materials and the treatment of toxic substances.

If you experience discomfort or skin irritation when wearing your smart watch, then we recommend you try cleaning your device. Sometimes residue or foreign materials build up around your device and may aggravate your skin. It's also possible that you are not wearing the watch correctly. We recommend making sure to clean and adjust your watch regularly for a more comfortable fit.

Caution:

- If you experience skin irritation when wearing your watch, please refrain from wearing, and wait two to three days to see if your symptoms ease. If symptoms persist or worsen, please consult a physician.
- If you have eczema, allergies or asthma, you may be more likely to experience a skin irritation or allergy from a wearable device.
