Charging Your Rush Charge

- Charge Rush Charge by using the your Smartphone's certified charging cable (not included).
- Charging time is approximately 2-3 hours to fully charge Rush Charge.
- USB charging without an AC power adapter tends to be slower.
- It is recommended to use a certified or an approved power adapter.

One LED: 1-25% Charged
Two LEDs: 25-50% Charged
Three LEDs: 50-75% Charged
Four LEDs: 75-100% Charged

* The LED lights are an approximate representation of the available battery power.

WARNING: The battery shall not be exposed to excessive heat such as sunshine, fire, or other high temperatures, it contains polymer battery.

Do not dispose of unit with general waste. Contains lithium polymer battery. Please return it to battery recycling collection center. For recycling center near you, call + 1 352-323-3500

Charging Your Smartphone with Rush Charge

After Rush Charge is fully charged, you can use it to charge your Smartphone. Before using for the first time, it is recommended to fully charge the Rush Charge for at least 2-3 hours until all four LEDs display a steady blue light.

- Charge times may vary depending on the model of the Smartphone and the battery capacity of the respective devices.
- Depending on use, the charge level and output times may vary.
- When the Rush Charge is almost completely depleted, the first LED will begin flash to indicate that it will be ready to be recharged.

Caution: Avoid any excessive pressure to Rush Charge while it is plugged into your device as this can lead to bending or damage of the connective tip which can cause a malfunction.

Charging Your Smartphone & Rush Charge at the Same Time

1. Connect your Rush Charge to the Smartphone.
2. Connect your Smartphone's certified charging cable (not included) to the side charging port.
3. This "Pass Through" feature will allow you to conveniently charge your Smartphone and Rush Charge at the same time.
4. Please note that this method will charge your Smartphone first and then your Rush Charge.

FCC Radiation Exposure Statement
This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter

This device complies with Part 15 of the FCC Rules, operation is subject to the following two conditions:
1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

- Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
- NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
 - Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/TV technician for help.
