

Cover Letter

Date: April 7, 2026

Dear Examiner,

This letter attests that the FCC guidance in KDB 996369 D02 Question 1 and KDB 996369 D04 for integrating modular transmitters into host equipment was followed for the preparation of this application under FCC ID: 2AXA8-FBO-2005B

The equipment has included certified transmitter as follows:

Original FCC ID	FCC Approval	Test report number	Description
RI7LE910Q1WWG	Initial Grant Date: 2025/03/11	SZCR250100008702	Power level is not changed. Spurious emissions have been observed as not degraded in the new conditions.
		SZCR250100008703	

1. The certified modular transmitter is integrated in this host as a component without any change on hardware design and software parameter settings.
2. MPE information and EMC evaluation are provided to verify that original test results represent compliance for the integration of transmitter modules under new conditions of this application.
3. The antenna types and peak gains used in the host device differ from those in the original modular test report; however, the applicable maximum ERP/EIRP requirements have been properly observed.
4. The original test report exhibitions have been submitted to represent test result under the new conditions.

Sincerely yours,
