Solder Board-Component View 2	 A photograph of a black, rectangular solder mask board. The board is positioned on a light blue surface. A ruler is placed vertically to the left of the board, showing measurements from 0 to 400 mm. The board has several small, circular holes and two small, rectangular components mounted on it.
Solder Board-Component View 3	 A photograph of a green printed circuit board (PCB) with various electronic components. The board is positioned on a light blue surface. A ruler is placed vertically to the left of the board, showing measurements from 0 to 400 mm. The board features a central black component, several smaller components, and a complex network of copper traces. Labels "COLD" and "HOT" are visible on the board.

Solder Board-Component View 11	 A photograph of a green printed circuit board (PCB) component, likely a WiFi antenna, placed on a blue surface. The component is rectangular with several gold-colored circular pads and solder points. It is positioned next to a black ruler with white markings in millimeters. The ruler shows measurements from 0 to 100 mm, with the component spanning approximately 40 mm in width and 20 mm in height.
Antenna View	 A photograph showing the WiFi antenna component installed inside a device. The component is mounted on a metal surface. A red box highlights the antenna, and a red line points from a label "WIFI Antenna." to it. The component is connected to a black cable. The background shows the internal structure of the device, including a metal frame and a black plastic component.
