Subject; Request for Confidentiality
FCC ID: **2AXBF-VLU6M4VP**

To Whom It May Concern,
Pursuant to the provisions of the Commission's rules Title 47 Sections §0.457 and §0.459, we are requesting the Commission to withhold the following attachment(s) as confidential documents from public disclosure indefinitely.

These documents contain detailed system and equipment descriptions and are considered as proprietary information in operation of the equipment. The public disclosure of these documents might be harmful to our company and would give competitors an unfair advantage in the market.

- ☒ Schematic Diagram
- ☒ Block Diagram
- ☒ Parts List
- ☒ Operational Description
- ☒ Tune-up Procedure

We would also request the additional items of USER MANUAL and INTERNAL PHOTOS to be held long term confidential for the reasons given below:

- ☒ USER MANUAL
- ☒ INTERNAL PHOTOS

Disclosure or publication or any portion of this company confidential material to other parties could cause substantial competitive harm and provide unjustified benefits for competitors.

We are specifically requesting Long Term Confidentiality to be applied to the User manual and Internal Photos, on the grounds that they contain proprietary technical information which, if made available for public viewing, could compromise the integrity of the product, its security and commercial success.

The product is used to fight against vehicle theft crime. It is covertly installed in a vehicle and is activated if the vehicle is stolen, thus enabling law enforcement agencies to detect and recover the vehicle. Having any of the product information (including the user manual and internal photos) in the public domain will give the vehicle thieves an advantage as they would be able to recognise, locate and devise methods that would render the product ineffective.

The User Manual is intended for professional installation technicians only, obligated under a NDA to keep the information secure.

An example of our NDA has been submitted along with the certification application. This NDA would be used when setting up agreements with installation partners, to ensure that such proprietary technical information is kept confidential.

No Short-term confidentiality is requested.

It is our understanding that all measurement test reports, FCC ID label format and correspondence during the certification review process cannot be granted as confidential documents and this information will be available for public review once the grant of equipment authorization is issued.

Sincerely,

Signature: *P J Sanders*
