

# Manual

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are

designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio

frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

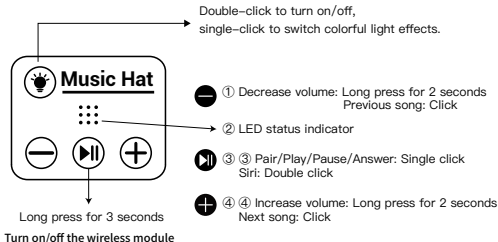

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

# LED Fashion Music Hat

## User Manual

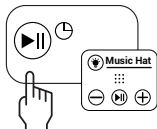

### Operation

Type-C charging port

### Wireless pairing

① Turn on the wireless module

② Turn on wireless on the device

③ Search for BT-01 and click to connect

## Specifications

## Charging function operation instructions

Connect the data cable to the USB charger (or computer USB port), and the other end to the device hidden under the wireless module. Our device has an LED indicator in the middle, with a constant red light indicating that the device is charging. The red light turns off once it is fully charged.

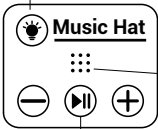

## Wireless version

If your phone or other wireless audio device does not have the AVRCP function, the next/previous song and play/pause commands will not be transmitted to the device when pressed. Please ensure you check if there is a software update available for your audio device.

## Instructions pour la fonction de charge

Connectez le câble de données au chargeur USB (ou au port USB de l'ordinateur), et l'autre extrémité à l'appareil caché sous le module sans fil. Notre appareil dispose d'un indicateur LED au centre, avec une lumière rouge constante indiquant que l'appareil est en train de se charger. La lumière rouge s'éteint une fois la charge terminée.

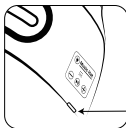

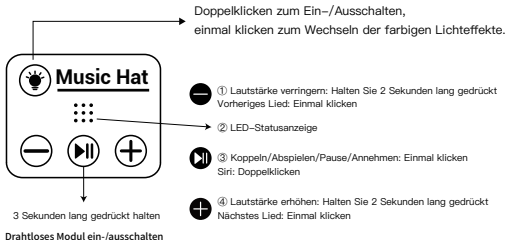

## Version sans fil

Si votre téléphone ou un autre appareil audio sans fil ne dispose pas de la fonction AVRC, les commandes de chanson suivante/précédente et de lecture/pause ne seront pas transmises à l'appareil lorsqu'elles sont appuyées. Veuillez vous assurer de vérifier si une mise à jour logicielle est disponible pour votre appareil audio.

## Anweisungen zur Ladefunktion

Schließen Sie das Datenkabel an das USB-Ladegerät (oder den USB-Anschluss des Computers) an und verbinden Sie das andere Ende mit dem Gerät, das unter dem drahtlosen Modul verborgen ist. Unser Gerät hat in der Mitte eine LED-Anzeige, bei der ein dauerhaftes rotes Licht anzeigt, dass das Gerät geladen wird. Das rote Licht erlischt, sobald es vollständig geladen ist.

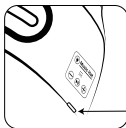

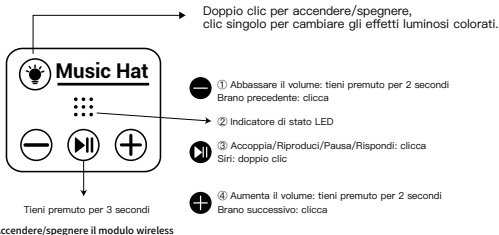

## Wireless-Version

Wenn Ihr Telefon oder anderes drahtloses Audiogerät die AVRCP-Funktion nicht unterstützt, werden die Befehle für das nächste/vorherige Lied und die Wiedergabe/Pause nicht an das Gerät weitergegeben, wenn sie gedrückt werden. Bitte stellen Sie sicher, dass Sie die Softwareaktualisierungen Ihres Audiogeräts überprüft haben.

## Istruzioni per la funzione di ricarica

Collega il cavo dati al caricatore USB (o alla porta USB del computer) e l'altro capo al dispositivo nascosto sotto il modulo wireless. Il nostro dispositivo ha un indicatore LED al centro, con una luce rossa fissa che indica che il dispositivo è in carica. La luce rossa si spegne una volta che la carica è completa.

## Versione wireless

Se il tuo telefono o altro dispositivo audio wireless non supporta la funzione AVRCP, i comandi per il brano successivo/precedente e la riproduzione/pausa non verranno trasmessi al dispositivo quando premuti. Assicurati di verificare se sono disponibili aggiornamenti software per il tuo dispositivo audio.

## Instrucciones de funcionamiento de la carga

Conecta el cable de datos al cargador USB (o al puerto USB de la computadora) y conecta el otro extremo al dispositivo escondido bajo el módulo inalámbrico. Nuestro dispositivo tiene una luz LED en el centro, la luz roja permanece encendida mientras se carga y se vuelve azul cuando está completamente cargado.

## Versión inalámbrica

Conecte el cable de datos al cargador USB (o al puerto USB del ordenador), y el otro extremo al dispositivo oculto bajo el módulo inalámbrico. Nuestro dispositivo tiene un indicador LED en el centro, con una luz roja constante que indica que el dispositivo está cargando. La luz roja se apaga una vez que se completa la carga.
