

English

Read the manual before use

Important: Plug in the charging wire for charging at the first time after receiving the goods, and use it after fully charging, which can make the Wireless earphone last longer

Important: Do not use super fast charging with current above 2A to avoid damaging the circuit chip due to excessive current

TWS connection, remove the earpiece from the charging bin automatically turn on and automatically pair.
(The red and blue lights flash alternately when the TWS is turned on. When the TWS is successfully paired, the red and blue lights of one earphone flash alternately, and the lights of the other earphone go out. After the phone is connected, the lights of the earphone go out.)

Turn on Wireless on your mobile phone, search for SP66 devices and click on the connection.

Press and hold for about 5 seconds to turn on/off.

the earphone touch control is marked in red circle

If only one earphone has sound, please delete the connected "SP66" first, turn off the wireless function of the phone, the earphone needs to be paired once, enter the tws mode, and then return to the first step

The connection steps are as follows:

TWS connection, remove the earpiece from the charging bin automatically turn on and automatically pair.
(The red and blue lights flash alternately when the TWS is turned on. When the TWS is successfully paired, the red and blue lights of one earphone flash alternately, and the lights of the other earphone go out. After the phone is connected, the lights of the earphone go out.)

Touch function

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
