Subject: Request for a Class II Permissive Change

FCC ID: 2AXKD-1EHM44NN
Grant Date(s): 03/25/2021

Pursuant to CFR47 §2.1043, the Grantee hereby requests a Class II Permissive Change for the above identified device because of following modifications:

The modular approved transmitter with the above listed FCC ID is integrated exclusively by the Grantee into his own dedicated host device HINO TELEMATICS CONTROL UNIT (FCC ID: 2AXKD-HINOTCU) using a different antenna trace design than the originally certified one and a unique external 4-in-1 vehicular antenna.

There are no further changes made to the original product. There are no changes made to the transmitter circuitry and the above listed changes result in the same RF characteristics as in the original filing - therefore the not repeated test results continue to be representative of and applicable also to this modified device. There is neither an increase in the output power, nor a change of the RF Exposure condition or equipment class and there are no other changes to the device that indicate a need for a new FCC ID.

Sincerely,

A handwritten signature in blue ink that reads "S. Berghahn". Below the signature, there is a small, faint timestamp "31.03.2021 06:39".

Sabrina Berghahn
