Label and Label Location

SHIFTPOWER PRO – Model family SPNNP (SP00P–SP99P) – PCB FSP5B – FCC

1. Required Markings

For FCC certification, the SHIFTPOWER PRO is permanently marked with the identifier “FCC ID: 2AXLF-SHIFTPPRO”. The device complies with Part 15 of the FCC Rules; the corresponding Part 15 compliance statement is provided in the user manual.

The marking is permanently laser-engraved (no adhesive label is used) within a 25 × 37 mm area on one external face of the enclosure; it is an integral part of the enclosure and cannot be removed without damaging it. The same engraved area also carries the product identification data — part number (PN), serial number (S/N) and hardware version (HW) — a 2-D (QR) code, and homologation markings for other markets. The manufacturer (Faaftech) logo is stamped on the opposite face of the enclosure.

2. Label Artwork

3. Label Location on the Device
