

APPENDIX D – FCC LABEL & LOCATION

LOCATION OF FCC ID AND LABEL

In reference to the required preparation documents, number 5: 'FCC ID label & Location on product'.

The Federal Communications Commissions (FCC) label is to be added to the *Major Label* (HS01-86), a laminated decal located on the rear of the medical device; *NUROCHEK headset* (HS01-001), where all other regulatory standard symbols, IDs and device information are located. A preview of the rear decal can be seen below in figure 1, with the FCC symbol and ID readable by the naked eye in the bottom left hand corner. A sufficient amount of space has been left for the yet to be allocated FCC ID, whether it be the minimum 7 or maximum 25 characters.

Figure 1. Major Label (HS01-086) of the NUCOCHEK Headset (HS01-001)

Figure 2 is an assembly drawing of the entire NUCOCHEK headset (HS01-001) from both a front and rear perspective. In this figure, the location of the major label, and hence FCC ID have been highlighted. While the medical device is utilized or idle, the major label and its contents will be visible by the naked eye as per FDA standards.

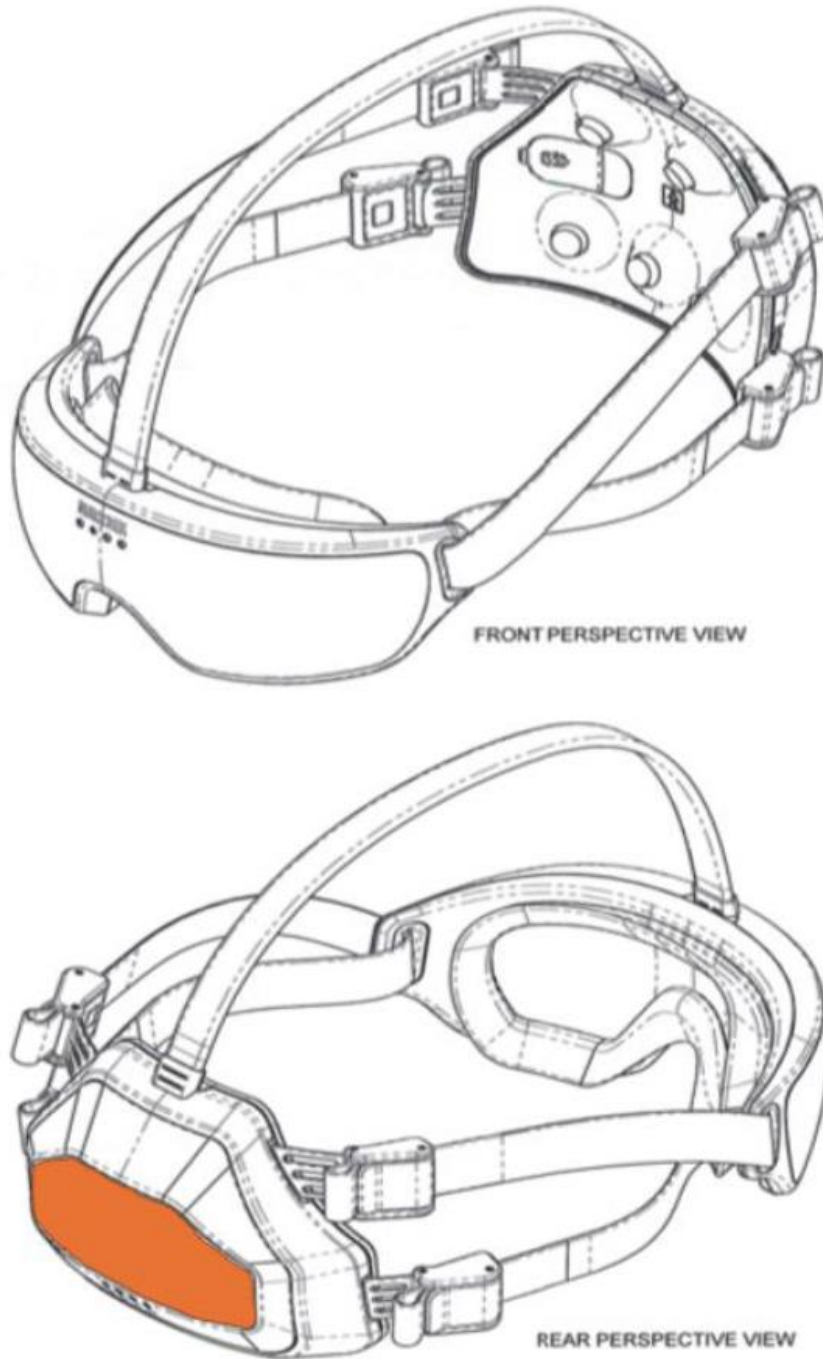

Figure 2. Assembly drawing of the NUROCHEK headset (HS01-001). The location of the major label has been highlighted in orange.

Figure 3. Mannequin demonstration head with NUROCHEK headset (HS01-001). The predicted area in which the FCC ID will be placed on the devices major label (HS01-086) has been highlighted by an orange rectangle.
