Solder Board-Component View 3	 A photograph of a circular green printed circuit board (PCB) component, identified as 'View 3'. The component is positioned on a light blue surface. To its left is a black ruler with white markings, showing a scale from 0 to 100 mm. The component itself is approximately 25 mm in diameter. It features various electronic components, including a large black integrated circuit (IC) in the center, several smaller surface-mount components, and a white label with the number 'F5' near the bottom edge. A thin, light-colored wire is attached to the top of the component.
Solder Board-Component View 4	 A photograph of the same circular green PCB component, identified as 'View 4'. The component is positioned on a light blue surface. To its left is a black ruler with white markings, showing a scale from 0 to 100 mm. The component is approximately 25 mm in diameter. It features various electronic components, including a large black integrated circuit (IC) in the center, several smaller surface-mount components, and a white label with the number 'F5' near the bottom edge. A thin, light-colored wire is attached to the top of the component.

Solder Board-Component View 7	 A photograph of a circular white component with a yellow cross-shaped marking. Two thin copper wires are attached to the component. The component is placed on a blue surface next to a black ruler with white markings. The ruler shows dimensions in millimeters (0 to 100 mm) and inches (0 to 4 inches).
Solder Board-Component View 8	 A photograph of a square copper component with a central square hole. Two thin copper wires are attached to the component. The component is placed on a blue surface next to a black ruler with white markings. The ruler shows dimensions in millimeters (0 to 100 mm) and inches (0 to 4 inches).
