February 11, 2026

Federal Communications Commission
Equipment Authorization Division
7435 Oakland Mills Road
Columbia, MD 21046
USA

Attn: OET Dept.

Applicant: **BCS Automotive Interface Solutions (Suzhou) Co., Ltd**
FCC ID: **2AXPS-WDC**
Product Name: **Wireless Device Charger**
Model: **WDC**

Dear Examiner,

This is to request a Class II Permissive change for FCC ID: **2AXPS-WDC**
originally granted on July 11, 2023

The change under this application is:

Due to the shortage of Nexperia components, we have looked for the new replacement components. For details, please refer to the “**Nexperia Alternative Component Change Points**” that submitted together with this application. At the same time, the product's label was also optimized.

These changes don't affect the charging function of the wireless charger.
We have verified spurious emissions based on the new replacement component and conducted new MPE tests. We are now applying for C2PC certification.

We declare that this Class II permissive change complies with FCC Notification 202109-001, items 1) through 9).

The details are provided below:

BCS Automotive Interface Solutions (Suzhou) Co., Ltd

No.2052 Taidong Road XiangCheng Economic Development District Suzhou, 215143 China

1) The requirements of § 2.1043 are fulfilled, i.e., the device's block functions for the fundamental frequency, primary modulator circuit, maximum power, or field strength ratings shall remain unchanged.

Response: Yes. Confirmed. Fully consistent with the previously approved product.

2) Transmitter PCB layout and parts changes are only permitted if there is no change in identifying a device's form, functional specification, as initially granted or previously approved under a Class II permissive change.

Response: Yes. Only the raw materials of the product have been replaced; the PCB is fully consistent with the previously approved physical circuit board of the same size.

3) PCB changes are limited to non-substantive modifications layout changes to the same size physical circuit board previously granted.

Response: Yes. The PCB is fully consistent with the previously approved physical circuit board of the same size.

4) C2PCPX is not permitted to add, remove, augment, or change capabilities, such as transmitters, increased bandwidth, additional rule parts, bands, etc.

Response: Yes. Confirmed. No modifications have been made in this regard and the product is fully consistent with the previously approved version.

5) In the PAG submission for item C2PCPX, the applicant shall provide complete information on testing demonstrating that the proposed changes for fundamental emissions are unchanged within the normal, acceptable tolerances and out-of-band; emissions do not exceed the appropriate limits.

The PAG submission shall include all applicable test reports and internal photos.

Response: Yes. Confirmed. Please refer to the submitted application documents

6) The modified device shall not be marketed under the existing grant of certification before confirmation that the C2PCPX PAG is approved and granted.

Response: Yes. Confirmed. The product shall not be sold prior to approval.

7) Software Defined Radio (SDR) grants that use the C2PCPX procedure are not permitted to make subsequent Class III permissive changes.

Response: Yes, this Class II permissive change complies with this requirement.

8) The C2PCPX PAG procedure has no impact on the provisions of V) of this publication for non-SDR software-only changes; thus, adding an equipment class when related to rule changes is still permitted.

Response: Yes, this Class II permissive change complies with this requirement.

9) Class I permissive changes are not permitted³ under this C2PCPX procedure.

Response: Yes, this Class II permissive change complies with this requirement.
