

GLOWE™

Quick Start Guide

- 1 Download the Glowe App.

- 2 Create your user account.
- 3 Check the settings on your phone. Glowe listens for notifications from Twitter, Instagram, Snapchat, and Facebook. It will also alert you of new Text Messages and Calls. Make sure you check the Notification Settings for each. If any are turned off, your device won't know to activate. These are the minimum phone settings we suggest for Glowe to deliver your social notifications.

4 Meet the Glowe Dashboard

- a Connect your device
- b Set up your profile
- c Hold for Light Show
- d Manage your contacts
- e Customize your alerts
- f Glowe Code manager
- g Chat with friends
- h Shop the Glowe store
- i Rename your device
- j Answers to questions

5 Set Up Your Glowe Profile

- a Upload an image
- b Be creative with your bio
- c Glowe Signature

A Glowe Signature is the combination of vibration and light that represents you. First choose your vibration and then pick three different light colors and pattern designs. You can play your signature at any time here or with a single tap on the Glowe logo on the dashboard.

6 Glowe Social Connect

Glowe automatically listens for activity on four social platforms and will notify you on your device based on your Glowe Code settings. Make sure to customize a Glowe Code for each so you will know where the notification came from.

Glowe will learn who your friends are, who you follow and will list them here. If you don't want a friend to activate your Glowe device with a notification, simply toggle them Off.

7 Secret Glow Codes

Imagine receiving a unique notification on your Glow device and knowing who it's from and what it means just by the custom combination of vibration and light. That's the purpose of sending and receiving Secret Glow Codes.

To create a new Glow Code, type the message that the code will represent, assign a vibration and three different light and color patterns. Save it and send it to friends. Your app will remember any Glow Codes that you send and any that you receive. You will also find them in your chat history.

8 Glow Code Messaging

Unique to Glow is the ability to chat with text messages or unique Glow Codes. Quickly send a saved Glow Code or create a new one by pressing the Glow logo. Select one from your saved list and it immediately sends and plays on your friend's device. When you receive one from a friend, it will appear in the chat and immediately play on your device. To help you learn the message of the Glow Codes, you can easily replay them in your chat or in the Saved and Received Glow Code screen.

9 Phone Alerts / Notifications

Your Glow device can also play custom alerts for calls, texts and timers.

Like Social Connect, you can toggle Phone Alerts on and off. Choose a custom vibration, sound and light pattern.

Preview the alert on your Glow device and Save your changes.

Glowe Button Functions

Your Glow device will arrive powered off – one short press will power it on and will be confirmed by a green Glow logo crossing the light array.

Power your Glow device off by pressing the button for 5 seconds – success is a red Glow logo crossing the light array. When powered on a single press will show the battery level. And two quick presses will send the light array into Light Show mode.

Glowe Warranty Coverage

Your Glow Social Wearable comes with a 1-Year Limited Warranty. For the duration of the warranty period, GoGlow, Inc. warrants the product against defects in materials and workmanship arising from normal use of the product. If there is a material defect in the product which is covered by this limited warranty GoGlow, Inc. agrees to exchange the product with a new equivalent product. This is the sole remedy available for breach of warranty.

For warranty service and to obtain return instructions, please contact customer service at service@goglowe.com. No product can be returned for warranty without an RMA number. To obtain service under this limited warranty, you will be required to provide GoGlow, Inc. with the original proof of purchase.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) this device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
