Q&A

When I place the phone on the charger, it starts charging, but after a few minutes it stops and the light starts to flash. Why?

- 1. Make sure your device supports the Qi wireless charging function before using this wireless charger.
- 2. Check if you are using the QC 3.0 adapter to power our wireless charger, or test with another adapter.
- 3. Test with other USB cables.
- 4. Check whether your device's case contains metal. Magnetic and metal attachments will cause an LED flash and prevent charging. If the phone has a case, please make sure the thickness is less than 5mm or remove the case before charging.
- 5. Please place the phone correctly. If the phone is placed in the incorrect position, it will affect charging.
- 6. Restart your phone.

Why can't I charge my AirPods 2?

- 1. Make sure your device supports the wireless charging function.
- 2. AirPods 2 is divided into two series; one supports wireless charging and the other cannot support wireless charging.
- 3. When your AirPods 2 has an indicator on the outside of the shell, it can support wireless charging. When your AirPods 2's indicator is inside the clam shell, it can't support wireless charging.
- 4. You can confirm by contacting the customer service.

What should I do if there is a problem with my product, but I can't find the solution on the user manual and the information on the product page?

- 1. For any product problem, you can always contact our customer service to get a solution.
- 2. Just connect with our customer service staff by going to Ordering → Ordering from Third-Party Sellers.

*Foldable 3-in-1 Wireless Charger. More Care-Free Storage.
