

Introduction

01

Scanning window

Please keep the optical glass clean to avoid inaccurate measurement during scanning process.

Cooling fin

For heating dissipation.

Slider

Keep distance between tire and device, to avoid broken and dirty of scanning window's glass.

Camera

For car license plate No. and VIN code scanning.

Scan button

Power button

Charging port

Power button

Power on: long press the button until the screen lights up.
Power off: long press the button and click "Power-off" on screen.
Restart: long press the button and click "restart" on screen.

Scan button

Long press the button to start scanning, and release the button to complete the scanning process.

Charging port

Micro-USB Charging supported.

How to use

02

Device Binding

Step 1: Download App from <http://everet.eae-ae.com/login>; and install "Leadshub";

iOS: Search and download "Leadshub" at App store.(China Market)

Step 2: Use device to scan the QR code that generated by "Leadshub" during the device binding process.

Tread Scanning Method

Press the scanning button

Device vibrating remind

Sliding device from tyre inner to outer side

Single tyre scanning complete

Device vibrating remind again

Release the scanning button

Attention:

Operating area: Device scanning window always needs to be fitted with tyre surface during scanning.

Operating direction: From tyre inner to tyre outside.

Start&ending point: Scanning window should be on the outer side of tyre shoulder.

Speed: 5-6 seconds by sliding smoothly

Correct:

Mistakes:

The equipment did not penetrate into the inside of the tyre.

The detection window is tilted up.

The equipment is not attached to the tyre.

Device Operating Process

Click Inspection Button

Car Plate Identified

External Tire Check

Check Report

Report Generated

Tread Depth Measurement (LF-RF-RR-LR)

Notes:

- During scanning, if you want to re-testing any tire, please click "C" to re-testing.
- If the technician needs supplementary detection information, it can be filled in "Diagnosis Supplementary".

Setting

WLAN: Switch ON/OFF wifi function, connect wireless network in this area

APN: Setting Access point names.

Brightness: User can adjust device brightness according to the using environments.

Sleep: User can adjust device sleep duration according to using habit.

Current version: Display device current version.

Device code: Display the device code, click the code to execute the device unbind operation.

Language: Switch the device display language.

It has 2 ways to check reports:

1.View it on the device side

- After finished inspection, device screen will jump to report page automatically;
- User can check report at history function
- ★ Scan the QR code in the report to get the digital inspection report.

2.Check reports at web site.

- User can log on website (<http://everet.eae-ae.com/login>) to check report.

Q: How to scan unlicensed car?

A: You can key in customized information to continue scanning process.

Q: It has some groove missing during measurement, eg. Tire has 4 grooves, but device displayed 3 grooves.

A: Sliding gesture and speed is important during measurement, if groove missing happened, you can adjust sliding gesture and speed, and re-inspect again.

Q: After submit the report, it only has single page report displayed on screen.

A: Device will produce a simple report if the network condition is bad. When the network return to normal, it will resubmit report and user can check the detail report in history.

Q: Device displayed no data after tread depth measurement finished.

A: Please keep scanning window clean

Q: “Re-inspection” reminder

A: If the slide speed is too fast or too slowly, device will display this message after tire inspection finished. User need to adjust slide speed and gesture, try again.

Q: Red light always displayed at device top right corner, and it cannot return to green lights.

A: Please unplug the charging cable before start/restart the device.

Item	Specification	
Measurement distance	0-10mm	
Accuracy	0.1mm	
Linearity	0.1mm	
Optical source	Single red laser point	
Laser Safety Level	Class I , IEC	
Camera pixel	113MP	
Screen	13.84cm (5.45”) HD+	
Battery	Full load	≈300 minutes
	Standby time	≈1 Week
Dimension	217mm*82mm*35mm	
Material	PC+ABS	
Mirror	Optical glasses	
Weight	415 g	
Environment temperature	-10~ 50 ℃	

Power supply

Micro-USB, Input: 100-240 V, 50/60 Hz; Output: 5V, 1.5A.

- ★ Please use the original charger to charge the device. It may cause some charging problems if use other charger.

Package List

HB04 1 pc, Power adapter 1 pc, Charge line 1 pcs.

SAR INFORMATION

The SAR limit of USA (FCC) is 1.6 W/kg. Device types HB04 (**FCC ID: 2AY2Y-HB04**) has also been tested against this SAR limit. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
