Solder Board-Component View 8	 A photograph showing a small green printed circuit board (PCB) component mounted on a blue textured surface. The component is positioned next to a black ruler with white markings. The ruler has two scales: a vertical scale on the left and a horizontal scale at the top. The vertical scale is marked from 0 to 100 mm, and the horizontal scale is marked from 0 to 100 mm. The component is located at approximately 10 mm on the vertical scale and 10 mm on the horizontal scale.
Solder Board-Component View 9	 A photograph showing the same green PCB component from a different angle. The component is mounted on the blue textured surface. The black ruler with white markings is visible, showing the component's position relative to the scales. The component is located at approximately 10 mm on the vertical scale and 10 mm on the horizontal scale.

Solder Board-Component View 10	 A photograph showing a small electronic component, likely a microcontroller or sensor, mounted on a blue printed circuit board (PCB). The component is positioned near a black ruler with white markings. The ruler shows measurements in millimeters (mm) and centimeters (cm). The component is oriented vertically, and its solder joints are visible. The background is a blue textured surface.
Solder Board-Component View 11	 A photograph showing a small electronic component, likely a microcontroller or sensor, mounted on a blue printed circuit board (PCB). The component is positioned near a black ruler with white markings. The ruler shows measurements in millimeters (mm) and centimeters (cm). The component is oriented vertically, and its solder joints are visible. The background is a blue textured surface.
