Model Differences Letter

FCC: 2AY5F-7376960

Mod. 7376960

The 7376960 aquarium heater family for North America market is composed by the following models:

3666090 (5310051) Rated input 150W,

3667090 (5310053) Rated input 200W,

3668090 Rated input 250W,

3669090 (5310052) Rated input 300W.

The only difference among them are:

The heating coils with different rated input power and the glass tube length.

The model 3669090 (5310052) is the main model (tested model) with the highest rated input. All the other models have lower rated input and different total length (see annex A).

All the models have the same PCB, electronic and software components and the same radio features.

Ralf Oberle
COO

ANNEX A
