

 AUTO-CLAMPING MAGNETIC WIRELESS CHARGER  USER'S MANUAL MODEL: VCW-516 1	Features 1. This product is compatible with the magnetic mobile phones. 2. Holds your phone in a snap, supports one-hand operation. 3. Supports up to 15W fast wireless charging (Depends on mobile required input). 4. The Auto-Sensing telescopic arms make clamping easier. 5. Built-in super-capacitor supports releasing clamps after power off. 6. Equipped with a hook which is easy to install and remove, fix on the air vent of the car firmly. 2	Descriptions  Clamps  LED Indicator  USB-C  Sensor Area  Air Vent Hook  Type-C Charging Cable 3	Instructions 1. Unscrew the screw nut from the charger, insert the ball joint into the groove, tighten the screw nut securely.   2. Loosen the knob to extend the hook, then put the hook onto the vent, tighten the knob clockwise.  3. Plug the quick car charger into the cigarette lighter and then power on the wireless phone holder using the Type-C cable.  4	4. When the power is turned on, the blue and red lights will flash once.  Note: Some phones may not support the light-changing function when they are fully charged. If your device is magnetic compatible, the phone holder will hold your device with a snap.  5	If your device has a thick phone case or if you want to use this wireless charger as a phone holder, you can rotate the arms to the front side. Then, simply touch the sensor area to release the charger's arms and place your phone in the holder.  6	7

LED Indicator Status		Wireless Charging		Troubleshooting		FCC Compliance Statement		Safety Guide		What is in the Package	
Power On	When the power is on, the blue and red lights will flash once, lights off when the charger is in standby mode.	Specifications	The device supports up to 15W wireless charging and is compatible with 10W/ 7.5W/ 5W wireless charging.	Issue	Problem	Prevention/Solution	This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.	radio communications. However, there is no guarantee that interference will not occur in a particular installation.	1. Do not drop, puncture or disassemble this product.	(1) Magnetic Wireless Charger	★ Please note product features will be upgraded without any notice.
Charging	The blue light will remain on when under the normal charging, the red light will remain on when under the fast charging. Lights off after fully charged.	Wireless Charger Input: DC 5V-2A 9V-2A	Baseline Power Profile: 15W Max	Can't hold the device with magnets	The phone doesn't support magnetic connection	Clamp the phone with the telescope arms	Warning: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.	If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:	2. This product is not waterproof, please do not expose it to rain or water splashing.	(2) Air Vent Hook	
FOD Testing	The red and blue lights will flash alternately when a foreign object is detected or an error is sensed in the placement of the phone, and the charging process will be stopped.	Charging Port: Type-C	Standby Power Consumption: <0.5W	Can't charge the device	The device doesn't support magnetic charging	The charger is incompatible with your device	This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to	– Reorient or relocate the receiving antenna.	3. For safety, do not prolong exposure to direct sunlight.	(3) Type-C Charging Cable	
Overvoltage	Blue light flash	This product is specifically designed for magnetic mobile phones. Other mobile phones that support wireless charging may experience less efficient charging or may not be compatible with this product for charging.		There has a metal plate between the coil and the phone	Remove the metal plate		This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to	– Increase the separation between the equipment and receiver.	4. Do not place this product in an open flame that may cause an explosion.	(4) User's Manual	
Undervoltage	Blue light flash			The input power less than 15W	The input power must exceed 15W, and use the low-loss cable			– Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.	5. Clean with a clean soft cloth and do not use any corrosive cleaning agent.	The FCC certification of this device refers to RF exposure testing performed in typical operating conditions, where a person is no closer than 20 centimeters from the device surface at all times, except for non-repetitive patterns with transient time intervals in the order of a second. Only in the stated conditions, the device is shown to fully comply with the FCC RF Exposure requirements of KDB 447498.	
Overheating	Red light flash			The phone with thick phone case	Recommended to use a mobile phone case with a thickness less than 4MM			– Consult the dealer or an experienced radio/TV technician for help.	6. Drive safely. Do not operate this product while driving.
