Press & Hold Transmit Button for 1.5s: Tone+Vibration; Static Shock +Tone

Frequently Asked Questions Answers

Q: Why doesn't the product work when the dog barks?

A: Please first ensure to fit the product snugly, yet loose enough to allow one finger to fit between the strap and your pet's neck. Some dogs have weak barking. In this case, you will need to level up the sensitivity level. A thick coat on the neck area may also have a small chance to decrease the sensing from the barking, trim the coat near the area where you place the product.

Q: Why is the product triggered sometimes in a noisy environment though the dog isn't barking?

A: Though we have optimized the barking detection to the best, some environment noises may have similar frequency to barking, which may have small chance to activate the product. Please lower the sensitivity level.

Q: Can this product stop my dog's howl?

A: No, this Bark Control Collar is designed to detect the barking only. It can not detect or stop the howling.

Q: Can I charge this product with any type of charger?

A: No, you are suggested to charge this product with a charger of 5V output voltage, because a charger with output voltage of 9V or 12V may cause damage to the product. The product will stop charging automatically if the input voltage becomes too high and the power indicator turns red.

Q: Will my dog stop barking completely?

A: The Bark Control Collar effectively and humanely stops all barking when it is worn. It should only be worn during periods of unwanted barking.

Q: Is the Bark Control Collar safe and humane?

A: Yes, the Bark Control Collar is designed to get your dog's attention, not to punish him. However, the initial Static Shock correction may startle your dog.

Q: When should I use the remote tag?

A: Use the remote tag to manually stop the barking when you feel the automatic modes cannot avoid the excessive barking.

XIII. FCC Statement

USA

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.
