Sealing gasket
Cotton wick

installation procedure

1. Open the device: Insert the key into the keyhole and turn counterclockwise to open the cover.

2. Fill essential oil: Take out the bottle, remove the atomizer head, fill the **ultrasonic special essential oil**.

3. Insert the cotton wick: Insert the cotton wick into the round hole of the atomizer head, then fix well the atomizer head with the bottle insert to the device.

4. Set the working time: press the button or connect mobile app via Bluetooth to set the working time of the device, close the top cover and lock it with the key.

5. Connect to the power: plug in **DC6V adapter** or insert 4 pcs AA batteries.

6. Install the device: Fix the hanging board in the appropriate position, align the device with the hanging holes and install it on the hanging board. Anti-theft screws can be installed as needed; or placed on the desktop for use.

Warning

1. Ultrasonic device must use special ultrasonic essential oil.

2. After installation, please keep the device vertical. Tilt or flip the device will leak oil and cause damage to the device.

3. If you are not a technician, shall not modify, disassemble or repair the device. If the device is faulty, please contact technical staff in time.

maintenance of equipment

When the following happens, the device needs to be cleaned

1. You are going to change another essential oil to use;
2. The amount of atomizing is getting weaker and weaker;

Cleaning steps

1. Take off the atomizer head, take out the oil bottle;
2. Fill appropriate amount of alcohol into the oil bottle, install it in the device to work 5-10 times to prevent cross-odor;
3. Cleaning is finished after oil bottle drying.

Troubleshooting

Before repairing the device, try to solve the problems according to the following methods.

Problem	Solution
No fogging	1. Check the power supply to see whether the positive and negative poles of the battery are reversed or the power adapter is not suitable. 2. Check whether the device is in "PAUSE" state. 3. Check whether the atomizing piece is workable or broken. 4. Check whether the copper contacts between the atomizing head and the fuselage are in good contact.
Small fog	1. Check whether the cotton wick is soaked in essential oil and inserted correctly and in good contact with the atomizing piece. 2. Check whether the atomizing piece is blocked or has foreign matter. 3. Check whether the essential oil level is too low.
Oil leak	1. Check whether the fuselage is tilted and the oil bottle is damaged. 2. Check whether the gasket is damaged and needs to be replaced. 3. Check whether the oil bottle and atomizing head are twisted or tightened parallel.

After-sales service

- ◆ Device from the date of sale, one year warranty, but not warranty shell, wire, ultrasonic module and external vulnerable items, man-made or accidental damage is not within the scope of warranty, beyond the free warranty period, paid maintenance.
- ◆ If you encounter any after-sales problems, you can contact the authorized sales service providers in each region, or contact our sales center.

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
