

## Antenna Specification

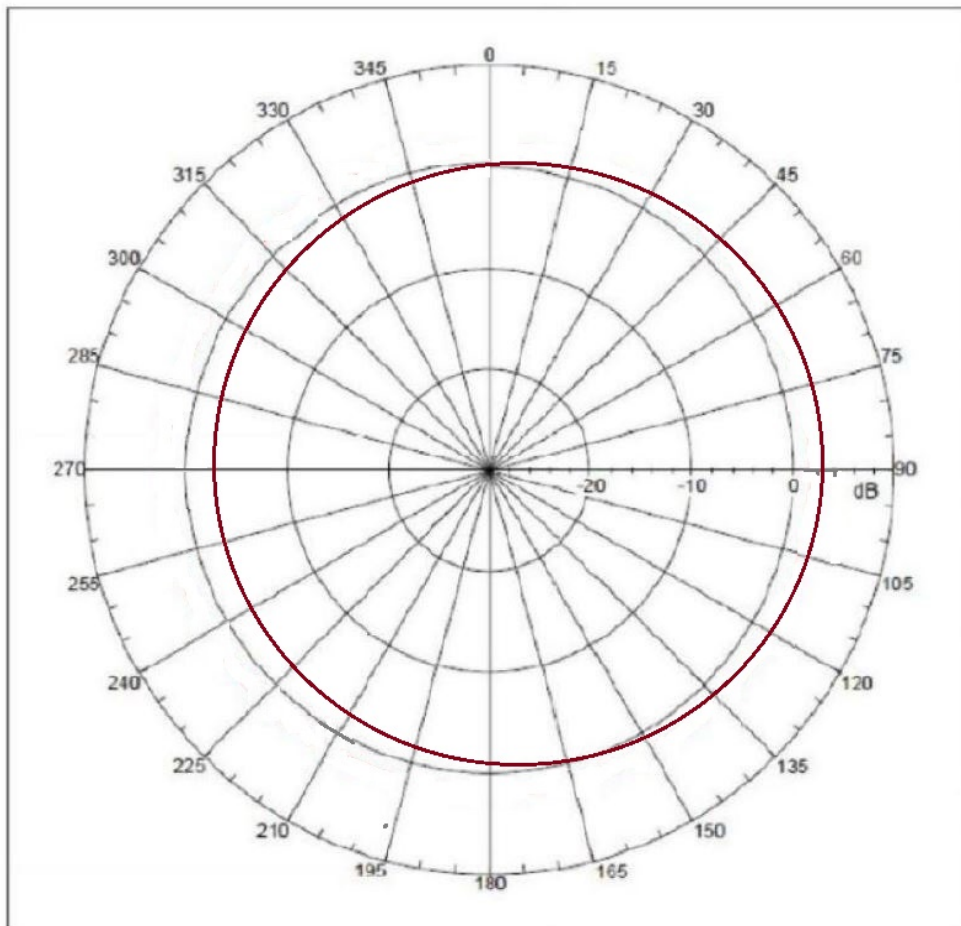

### 1. General Information

|                     |                                                                         |
|---------------------|-------------------------------------------------------------------------|
| Model Name          | UV5F                                                                    |
| Operating frequency | 136-174MHz, 400-470MHz                                                  |
| Max. Antenna Gain   | 2.15dBi                                                                 |
| Manufacturer        | Quanzhou Buxun Electronic Technology Co., Ltd.                          |
| Address             | No.28, Xiaguangwu, Xiamei Village, Xiamei Town, Quanzhou, Fujian, China |
