

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Radiation Emission Test Setup (Below 30MHz)	 A photograph showing a radiation emission test setup for frequencies below 30 MHz. A yellow, rectangular test chamber is positioned on a circular turntable. The chamber is surrounded by a dense array of white, square-shaped electromagnetic interference (EMI) absorbers mounted on a black frame. The floor is a light-colored, polished metal surface with yellow and black safety stripes. A metal frame is visible in the foreground.
Radiation Emission Test Setup (30MHz to 1GHz)	 A photograph showing a radiation emission test setup for frequencies from 30 MHz to 1 GHz. The yellow test chamber is on a circular turntable, surrounded by white EMI absorbers. In the foreground, a metal frame with several vertical rods is visible, likely part of a probe or antenna array. The floor is a light-colored, polished metal surface with yellow and black safety stripes.

**Radiation Emission Test
Setup (1GHz to 18GHz)**
