Cautions

If the machine starts or shows other abnormal phenomena, please contact a dealer or our after sales service.

Do not touch the machine with your wet hands, and please place the machine in a ventilated place.

Do not touch the machine at high temperatures, otherwise it will cause the internal components of the machine to fail.

The product should not be exposed to environments such as direct sunlight, baking, or serious overheating environments.

Do not go to work after falling asleep.

Do not replace the battery manually, improper battery replacement can cause fire and may explode; it can be replaced for replacement.

Do not use the product in a humid environment, otherwise it will not be exposed to environments such as direct sunlight, fire, baking, or serious overheating.

To ensure battery safety, please charge with the temperature range of +20~40°C. The charging function will be turned off if it exceeds this temperature range.

To ensure product safety, the product should be used with the temperature range of 10°C~45°C. The product may work abnormally if it exceeds the temperature range.

The product does not support fast charging, it is recommended to use the standard charging method for the product charging.

The company is constantly committed to improving the quality and performance of products, product technology and design is updated, without affecting the safety of the product, the company reserves the right to not to continuously improve the product, the function of the product that you purchased.

Warning

This device complies with part 15 of the FCC Rules. Interference is subject to the following two conditions: (1) The device may not cause harmful interference, and (2) the device must accept any interference received, including that which may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy, and it not installed and used in accordance with the instructions may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, you can determine by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/television repair person.

The device has been evaluated to meet FCC EMI requirements for help. The device can be used in a portable equipment condition without restriction.
