

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of a device. On the left is a red plastic housing with a black circuit board mounted inside. The board features a battery, various electronic components, and a green connector. To the right is a white plastic housing, also showing internal components. Both are placed on a blue textured surface next to a black ruler with white markings for scale.
Solder Board-Component View 1	 A close-up photograph of the circuit board from the previous view. The board is populated with numerous components, including integrated circuits, capacitors, and resistors. A green connector is visible on the right side. The board is placed on a blue textured surface next to a black ruler with white markings for scale.

Solder Board-Component View 2	 A photograph of a small, black printed circuit board (PCB) component. The board is populated with various electronic components, including a central integrated circuit (IC), several resistors, and capacitors. A green cylindrical component is visible on the right side. The board is placed on a blue textured surface next to a black ruler with white markings. The ruler shows dimensions in millimeters, with the component spanning approximately 40mm in width and 20mm in height.
Solder Board-Component View 3	 A photograph of a rectangular, silver-colored battery component. The battery has a yellow label with text: "- VWE 602040 3.7V" and "+ 450mAh 1.665Wh 2109". Two wires, one red and one black, are connected to the battery. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows dimensions in millimeters, with the battery spanning approximately 60mm in width and 15mm in height.
